SUMMARY

OVERVIEW

Los Angeles Valley College (LAVC) occupies a 105-acre campus in Valley Glen in the San Fernando Valley. Since it first moved into this site in 1951, it has developed into a uniquely organized campus within a majestic urban forest. While the existing campus' organizational framework remains distinct, with its formal quad and covered walkway, fragmentary development in certain areas has muddled its formal clarity and weakened the campus identity.

The master plan update strengthens LAVC's campus identity by reinforcing its natural assets, enhancing its variety of gathering spaces, and improving its overall cohesiveness while maintaining its existing organizational framework. The formal open space consisting of Monarch Square and the North Lawn is complimented with a new informal park that runs parallel to it through the heart of the campus. Athletic fields are consolidated in the south-east quadrant of the site, and is connected to the rest of the campus by a landscaped promenade. The whole campus is then conceptually tied back to the community via an arroyo feature that takes advantage of the campus' existing gradual topography and adjacency to Tujunga Wash, a Los Angeles River tributary and designated urban natural habitat.

The master plan update represents a long term vision, planning beyond current projected needs and available funding, to ensure a holistic development for the campus. Two horizons are delineated for implementation and planning purposes. LAVC is also pursuing a satellite campus for the Burbank area, however this project is still in its preliminary stage and therefore is not addressed within the context of this document.

Horizon 1 illustrates the master plan update for the campus to be completed with Measure J funding. It responds to projected needs for the college as identified in the Educational Master Plan. Projects in this horizon include Media Arts / Performance Arts Center, Monarch Center (Student Union), Workforce Development Center / Administration, Multi-Purpose Community Services Center, Athletic Training Facility, Planetarium Building Expansion, Parking Structure, consolidation of Athletic Fields, Bungalow Demolition, Campus Modernization, general landscape and hardscape improvements.

The campus' future full build-out, which is dependent on the future needs of the college beyond current projections, is illustrated in Horizon 2. It includes two instructional buildings - one to replace Humanities and Behavioral Science and a second to accommodate future growth, and a second parking structure.

While the Master Plan Update illustration appears specific, it is merely a conceptual sketch which highlights planning intents. The final design of each facility and site will be developed with more detailed study to be done by a selected design team and a college formed Building User Group (BUG).

Information contained herein is intended for the sole benefit of Los Angeles Valley College and Los Angeles Community College District and is not intended to create any rights or benefits for any other parties.

Los Angeles Valley College
5800 Fulton Avenue, Valley Glen, CA 91401

PROCESS

In the fall of 2008 LAVC selected Steinberg Architects to develop a master plan update in response to the passing of Measure J bond, which allocated \$305 million for capital construction for the college. The process of updating the master plan began in April of 2009, and a series of workshops and meetings were held with the Master Plan Committee and College throughout the year. The result of the first of these workshops was the creation of the goals for the master plan update. Along with the college's vision & mission statement and strategic educational objectives, the goals served as guiding principles for the master planning process.

Concurrent with the early meetings, a utilization analysis was performed for all the existing buildings. The purpose of the study was to document current space use and make recommendations to improve efficiency.

A variety of options were discussed during the planning process with a strong emphasis on aligning the college's educational goals with the facility needs and desires, while addressing the physical and logistical opportunities and constraints. The intent of the plan is to serve as a guide as the campus continues to develop.

GOALS

LAVC VISION STATEMENT

Los Angeles Valley College serves the community as a leader in instructional excellence, facilitating the success of its diverse students, developing critical thinkers and life-long learners, and contributing to the economic vitality of the San Fernando Valley and beyond.

LAVC MISSION STATEMENT

Los Angeles Valley College is a comprehensive community college located in the center of the San Fernando Valley. The College serves the community by providing transfer, degree, career-technical, foundational, transitional and continuing education programs in an attractive and accessible learning environment that fosters student success. Embedded in these programs are the greater goals of critical thinking and life-long learning which are necessary for success in the workplace and for advancing one's education, personal development and quality of life.

The Los Angeles Valley College faculty and staff are dedicated to helping students be successful. They emphasize excellence in teaching and providing a variety of support services that are designed to meet students where they are and help them reach their personal and professional goals. Beyond the classroom, the College provides for students a variety of co-curricular activities that serve to create a rich campus life experience.

Los Angeles Valley College advances the economic development of the region through programs, services and partnerships that address continuing and emerging employer needs in a diverse set of industries, including one of the largest concentrations of entertainment studios in the world.

Los Angeles Valley College hosts numerous cultural and athletic events throughout the year and serves as home to the San Fernando Valley Historical Museum.

The campus has a park-like quality, with a rich variety of trees selected by its founding faculty. As a result, the campus itself serves as a laboratory for learning and gives the College a special appreciation for the environment and issues of sustainability.

GOALS OF THE MASTER PLAN UPDATE

- Provide an attractive, safe, accessible and high-quality learning environment.
- Create a rich campus life experience.
- Provide an environment that stimulates co-curricular activities, community and economic development, and cultural and athletic events.
- Maintain the park-like quality with a rich variety of trees.
- Turn the campus into a “laboratory for learning” that respects the environment and integrates sustainable design and practices.
- Provide a variety of gathering spaces appropriate for the college’s diverse population
- Strengthen the identity of the college by improving the campus’ edges and wayfinding.
- Link disjointed areas through landscaping and visual axes to achieve a more cohesive campus.

2

ANALYSIS

HISTORY

Original Property and DuPlessus Family 1936

1949 Los Angeles Valley College was founded on September 12. The College was officially chartered by the Los Angeles Board of Education in June 1949 and was located in the campus of Van Nuys High School.

1951 LA Valley College moved to its current location on Fulton Avenue in Valley Glen.

1959 Phase I of Master Building Plan by Lester H. Hibbard & Harold C. Chambers completed.

- Engineering (1959)
- Chemistry (demolished 2009)
- Physics (demolished 2009)
- Foreign Language (1959)
- Administration (1959)
- Library (demolished 2009)

1961 Phase II of Master Building Plan completed.

- Music (1961)
- Theater Arts (1961)
- Life Science (1962)
- Cafeteria (1961)

Construction of Old Library 1959

HISTORY

1963 Phase III of Master Building Plan completed.

Business-Journalism (1964)

Math-Science (1964)

Art (1964)

Planetarium (1964)

1969 Los Angeles Community College District was formed, and its nine colleges were separated from the Los Angeles Unified School District.

1973 Phase IV of Master Building Plan completed.

North (Women's) Gymnasium (1973)

South (Men's) Gymnasium (1961)

Behavioral Science (1965)

Humanities (1965)

Campus Center (1971)

1974 Valley College Historical Museum, the only museum dedicated to the history of the San Fernando Valley, was founded.

2001 Proposition A was approved.

2003 Facilities Master Plan

Proposition AA was approved.

Maintenance & Operations - Sheriff Station (2005)

Concession Stand & Visitor Restrooms (2006)

Monarch Stadium / Track and Field (2006)

Allied Health & Sciences Center (2006)

Swimming & Diving Pools (2007)

Fulton Avenue Entry & Monarch Square (2008)

Disabled Student's Gymnasium (2008)

Campus Aerial Photograph c.1970

Covered Walkway c.1965

Campus Center

HISTORY

Motion Picture / TV Studio (2008)

Child Development & Family Complex (2009)

Student Services Building (2010)

Hertzberg Library & Academic Resource Center (2010)

2005 Metro Orange Line opened, with a Valley College station at the intersection of Burbank Boulevard and Fulton Avenue.

Facilities Master Plan Update

2008 Measure J was approved.

Media Arts Building

LAVC Community Workforce Development Center

Athletic Training Facility

Planetarium Building Expansion

*figures based on 2009 Report 17, with the following modifications:

1. Life Science renovated to Emergency Services Training
2. Life Science Storage has been demolished and taken out of the list
3. Child Development & Family Complex, Student Services Center (& Annex), and Hertzberg Library & ARC added, pending completion in 2010

BUILDING AGE AND CONDITION

Figure 2.4 Existing Campus Building Age and Condition

The existing campus consists of buildings that have been constructed over a span of more than 50 years. While few buildings can be considered architecturally significant, the organizational framework of a backward “J” is unique to the campus.

Buildings on the northern campus appear as singular objects within an orthogonal grid of pedestrian pathways. Buildings on the south are long, narrow one-story buildings that radiate off the curve of the “J” and blend with the surrounding landscape and urban forest.

FRAMEWORK

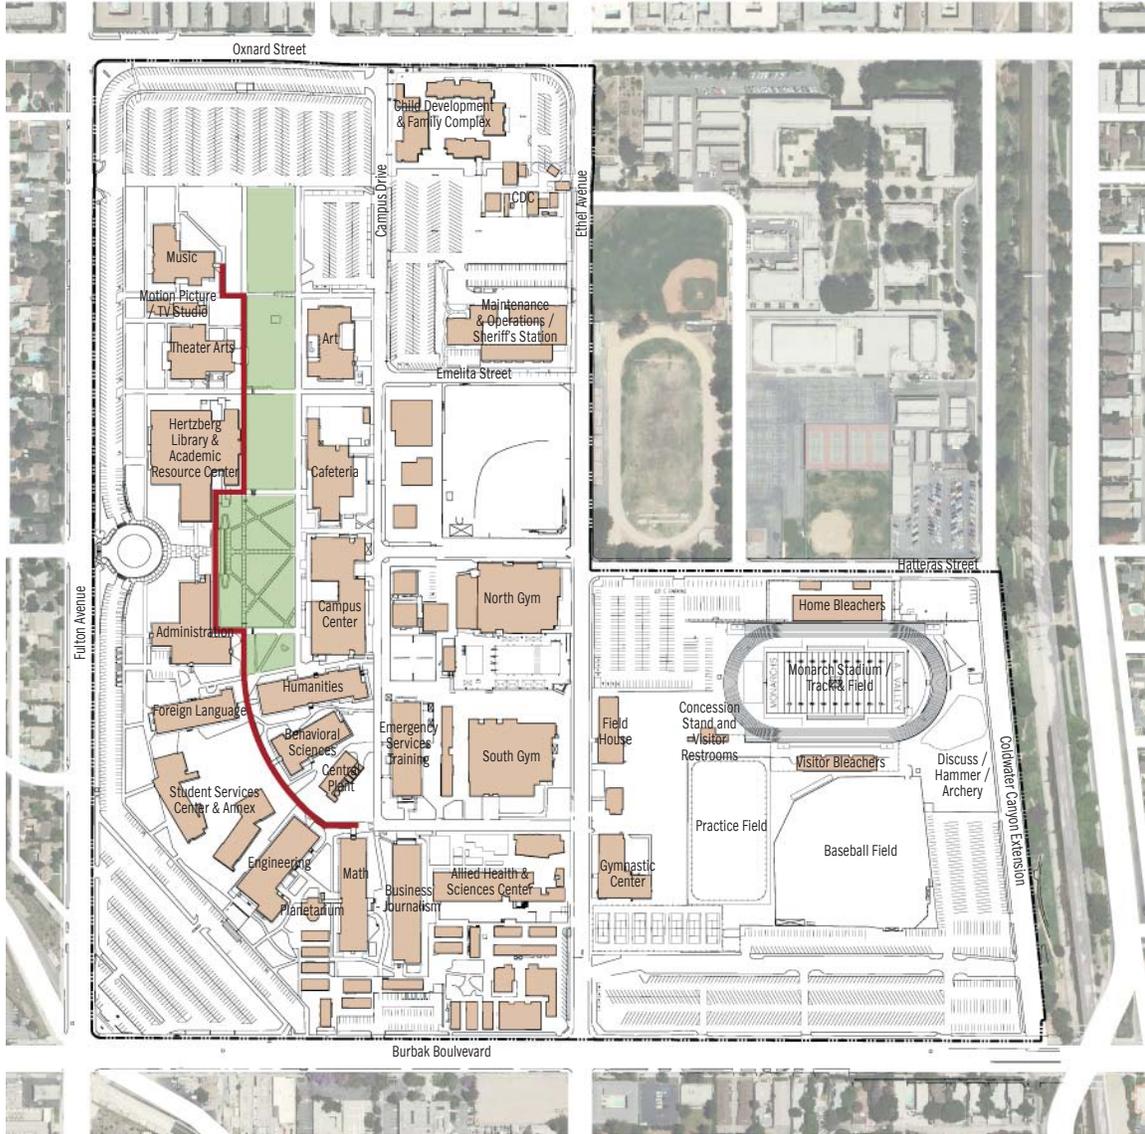

Figure 2.5 Existing Campus Framework

The campus framework is defined by a formal central quad - Monarch Square - and the North Mall: an open green space to the north. A covered walkway serves as a primary pedestrian circulation between classroom buildings, linking the north campus to the south and creating a physical spine that defines the backwards “J”.

- Covered Walkway

4. Core Open Space
5. Sports Complex

SWOT Analysis (Strengths, Weaknesses, Opportunities, and Threats)

1. Strengths

- a. Mature, well structured, urban forest.
- b. Park-like setting.
- c. Robust landscape planting & structure.
- d. Distinctive Improvements

2. Opportunities

- a. Reorganization of landscape spaces to improve social spaces, identity, and sustainable systems
- b. Connection to Tujunga Wash
- c. Site History
- d. Urban Edge
& Public Transportation Link
- e. Prototype for Sustainable Development & Practices

3. Weaknesses

- a. Disconnected Open Space & Way finding
- b. Dispersed Gathering Spaces & Program
- c. Inconsistent Campus Furniture; Stark Materials
- d. Sustainable Landscape Practices; Water Use & Quality
- e. Heat Island

4. Threats

- a. Renovations weaken identity & campus structure
- b. Water scarcity & global warming
- c. Urban forest needs planning for the future

MASTER PLAN UPDATE

FACILITIES SUMMARY

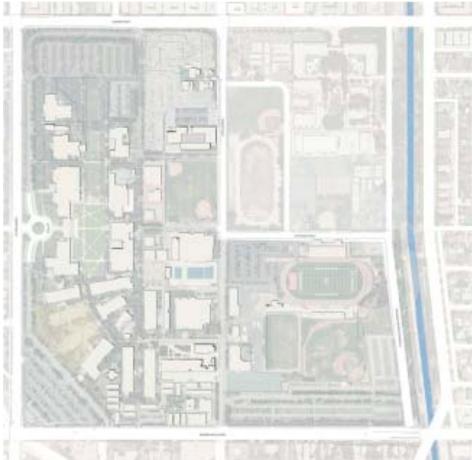

The master plan update builds upon the campus' existing framework and prior planning to strategically locate new projects creating structure and coherence. The original identity of Monarch Square and the North Mall is respected and reinforced by the placement of appropriately scaled buildings at its perimeter to emphasize the definition of this outdoor space.

The sustainable park, a new feature from prior plans, is realized through the consolidation of all athletic fields. This new open space runs parallel to the North Mall and serves as a link to the academic and athletic zones. As a compliment to the traditional spaces on campus, this area will become a new campus "green" - a sustainable park with native and drought tolerant plants, an area for the college and community to gather and learn.

The Athletic Zone now has a dedicated plaza for gathering of pre- and post-game functions, as well as community events. It is connected back to the main campus through the ceremonial Alumni Walk.

LAVC is dedicated to becoming a model of a sustainable campus and using its assets as educational tools. A variety of sustainable strategies - both building and site - were identified in the process as opportunities for future projects to implement.

The logistics of implementation also played an important role in the development of the plan update. Studies to ensure that all program that is being displaced by demolition will have a designated final location, and an interim location if necessary, were done.

Existing Campus

Master Plan - Horizon 1

Master Plan - Horizon 2

MASTER PLAN - HORIZON 1

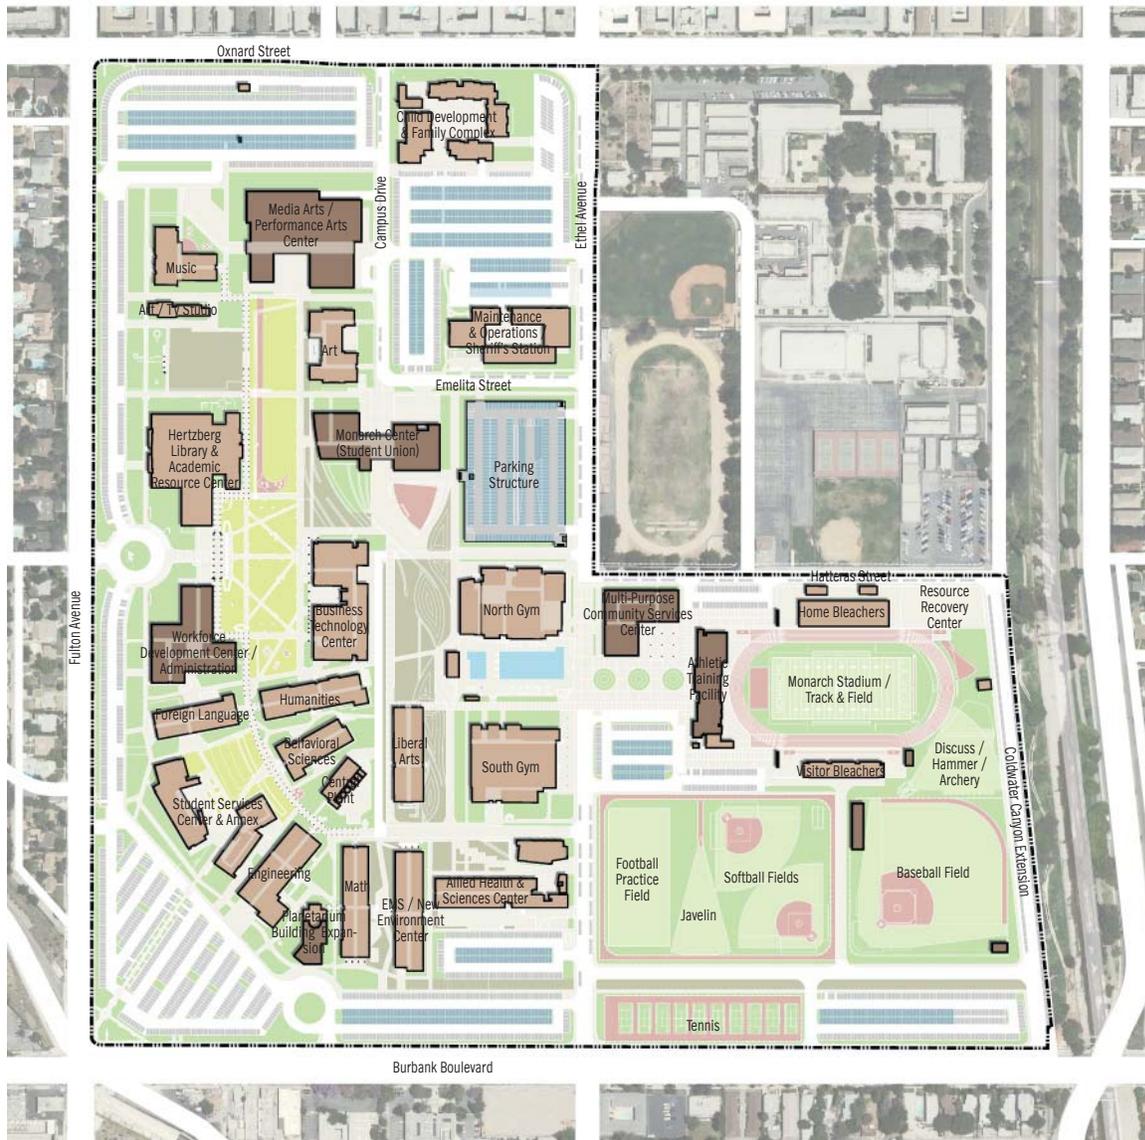

Figure 3.1 Master Plan - Horizon 1

Horizon 1 illustrates the master plan update for the campus to be completed with Measure J funding. It responds to projected needs for the college as identified in the Educational Master Plan. Projects in this horizon include Media Arts / Performance Arts Center, Monarch Center (Student Union), Community Workforce Development Center / Administration, Multi-Purpose Community Services Center, Athletic Training Facility, Planetarium Building Expansion, Consolidation of Athletic Fields, Bungalow Demolition, Campus Modernization, and General Landscape and Hardscape Improvements.

MASTER PLAN - HORIZON 2

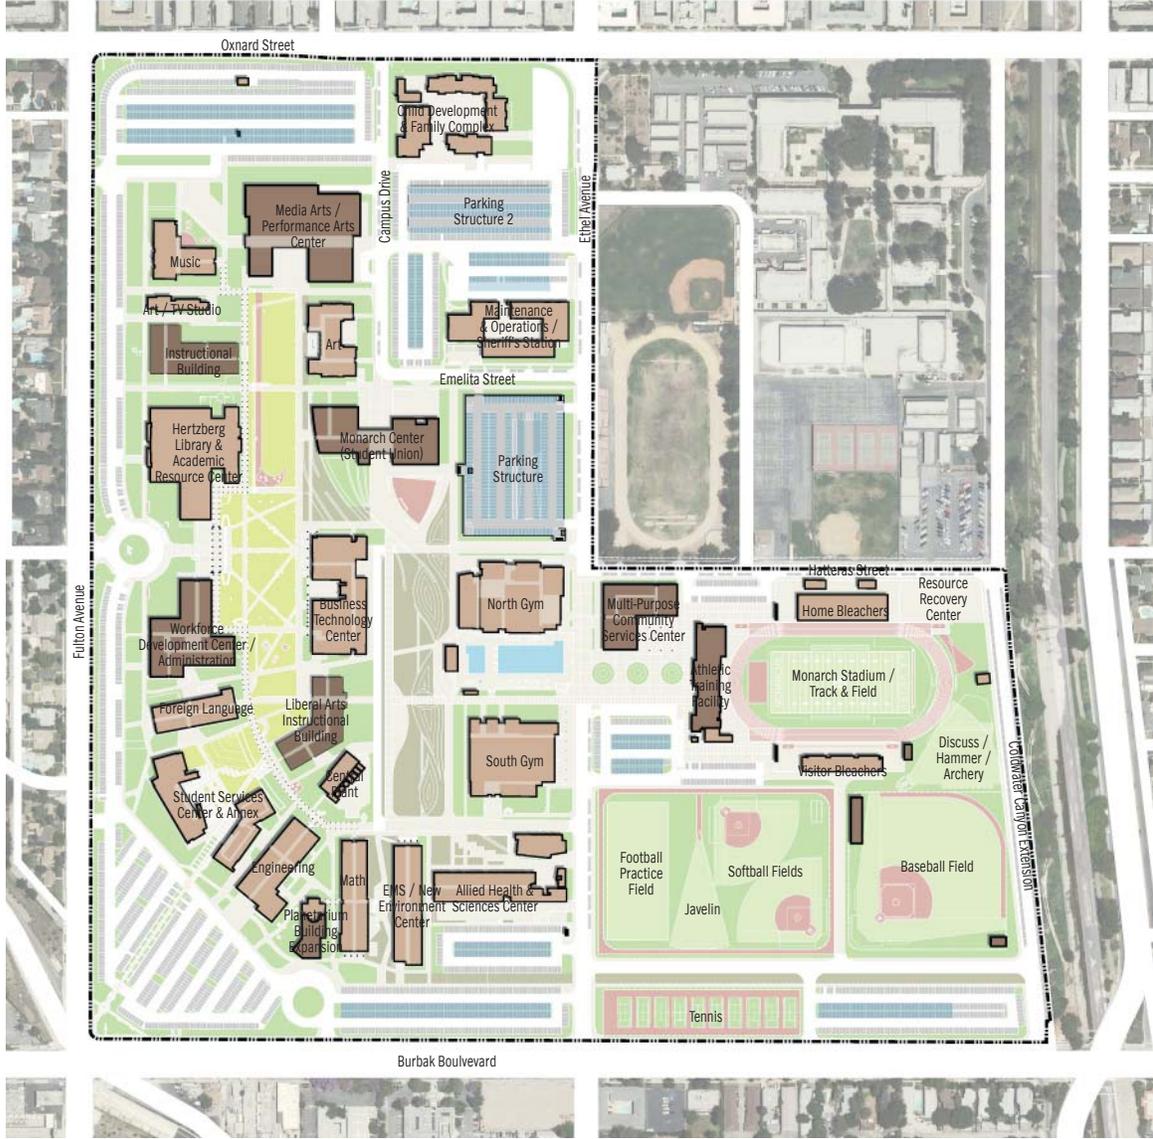

Figure 3.2 Master Plan - Horizon 2

The full build-out master plan update represents a long term vision, planning beyond current projected needs and available funding, to ensure a wholistic development for the campus. It includes a three-story Liberal Arts Instructional Building to replace Humanities, Behavioral Sciences, and Liberal Arts. The second instructional building in the arts district and a second parking structure to accommodate future growth.

- Existing Building
- New Building

BUILDINGS SUMMARY

Bldg. #	Building Name	Year Completed	Total ASF	Total GSF	Efficiency

SUSTAINABILITY

Figure 3.7 Master Plan Update Site Sustainable Strategies

The Los Angeles Community College District (LACCD) Board of Trustees has adopted a district-wide Sustainable Building Plan to incorporate energy-saving and environmentally friendly features into the new structures. The above diagram identifies potential implementation location for various sustainable strategies, for which the campus intends to become a laboratory for learning. Implementation of these strategies are to be further discussed by LAVC’s sustainability committee and will be in accordance to the LACCD Sustainable Design Standard.

-  Existing Sun Chiller Solar Vacuum Heat Tubes

ARCHITECTURAL SUMMARY

Figure 3.9 Master Plan Update Building Zones

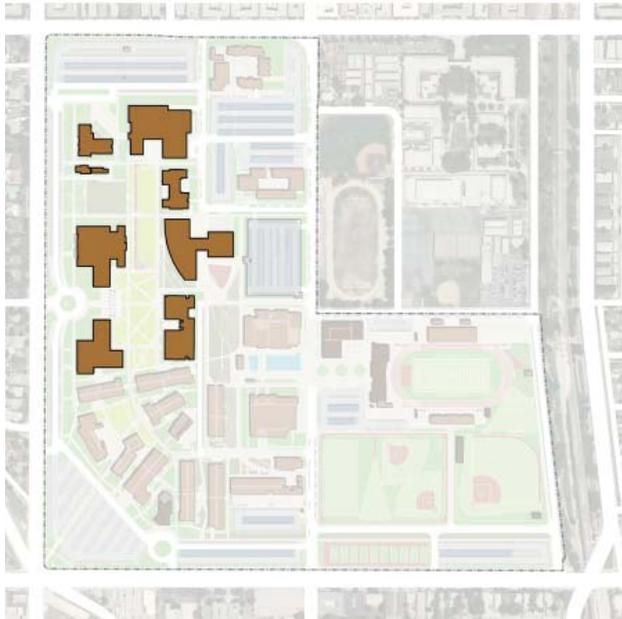

The Architectural Zones provide framework for individual projects to ensure that the development of specific areas on campus remain consistent with the overall master plan vision. Three building zones are identified, each with a particular character related to its location. These are buildings around the formal quad, buildings along the backwards “J”, and buildings in PE/Athletic area.

Each proposed facility is described in terms of their function to serve internal user groups’ needs as well as their role in the overall campus master plan.

- Buildings Around Formal Quad
- Buildings Along Curving Covered Walk
- Buildings in PE / Athletics Area

ARCHITECTURE

Art Building

BUILDINGS AROUND FORMAL QUAD

Buildings in the Arts District and around Monarch Square are formal and monumental to reflect the character of the quad they contain. These buildings should have main entrances from this outdoor space.

Smaller outdoor spaces such as courtyards, patios, and gardens, may be associated with each building for more specialized activities.

Campus Center

Hertzberg Library and Academic Resource Center

ARCHITECTURE

Humanities Building

BUILDINGS ALONG CURVING WALK

Buildings in the South Campus District, particularly the ones along the curving covered walkway are humble and intimate buildings nestled within the trees.

The covered walkway is an integral part of the campus identity and should be maintained and upgraded. Putting a bright splash of color on the underside of the canopy could liven up this circulation spine.

Foreign Languages Building

Covered Walkway

ARCHITECTURE

PE / ATHLETICS

With the consolidation of athletic fields in the south-east quadrant of the campus, an athletic complex is created centered around a large plaza suitable for large events. Alumni Walk, a formal promenade ties this complex back to the heart of the campus, as well as creates ceremonial paths to both “Home” and “Visitor” stadia.

Concession Stand & Visitor Restrooms

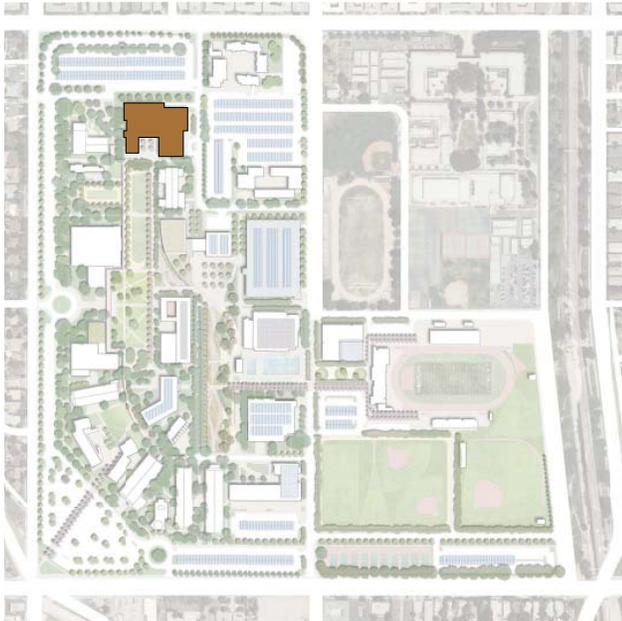

North Gym

Home Stadium Bleachers

ARCHITECTURE

MEDIA ARTS/PERFORMANCE ARTS CENTER

64,200 ASF / 102,720 GSF

Originally designed as a Media Arts Building, the new project combines the Media Arts with a new Performance Arts Center.

As a combined project, the facility shares common spaces thereby increasing efficiency and reducing cost. The project is located at the north end of the mall and acts as the end cap to this formal outdoor space. The building will be visible from outside the campus on Oxnard Boulevard and Fulton Avenue.

Schematic Design Rendering
LAVC Media Arts / Performance Arts Center

ENRlich ARCHITECTS

ARCHITECTURE

MONARCH CENTER (STUDENT UNION)

26,600 ASF / 40,923 GSF

This building is sited in a critical junction in the center of the campus. It is important that the building's design reflect its function as a circulation hub. Transparency and permeability should be emphasized. Integral to the building is a large plaza for various events.

Consistent with the idea of this project being a convergence zone, the plaza has the opportunity to warp and slope up becoming a green roof. The space combines ideas of sustainability and social activity into physical form.

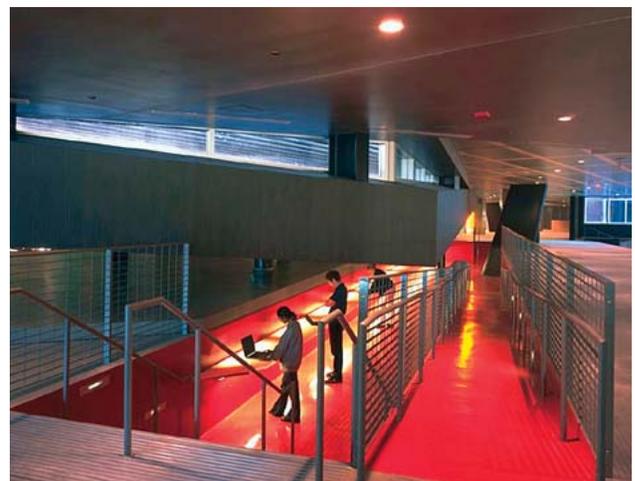

Initial occupants, to be confirmed during detailed programming, include: bookstor, cafeteria, faculty lounge, Health Services, Lion's Den, offices, and meeting rooms. It was noted that a food kiosk is desired on south campus to serve that population.

Delft University of Technology Library
Delft, Netherlands

California Academy of Sciences
San Francisco, California

IIT McCormick Tribune Center
Chicago, Illinois

ARCHITECTURE

PARKING STRUCTURE

The four-level parking structure, parking at least 1,200 cars, is centrally located on campus adjacent to Monarch Center and the new Student Plaza.

The structure will have two primary pedestrian access points: one on its west side off of the Student Plaza, and another on its South-East corner favoring the Athletics Events Plaza.

Vehicular access will primarily be off of Ethel Avenue, with an auxiliary access point from its north side off of the service road.

The first level of the parking structure should have designated spaces for short term parking for passenger drop-off and pick-up, as well as reserved spaces for handicap parking, carpool vehicles, and charging stations for electric cars. A section of the first level may be designated for faculty and staff.

Photovoltaic canopies are recommended to be installed over the roof deck.

Arizona State University Parking Structure
Tempe, Arizona

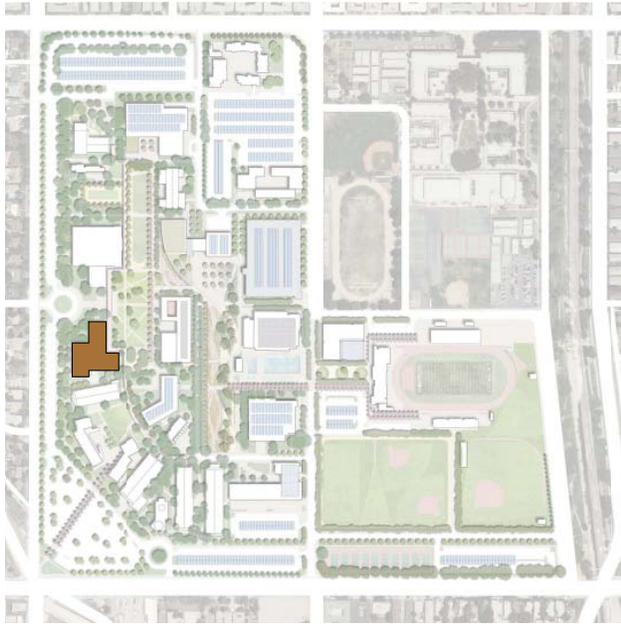

Fairfield Multi-Modal Transportation Center
Fairfield California

Parking Structure, CSU Fullerton
Fullerton, California

ARCHITECTURE

WORKFORCE DEVELOPMENT CENTER /ADMINISTRATION

42,767 ASF / 65,795 GSF

A new two story building to house the Workforce Development Center, Administration offices, and Lecture Rooms will replace the existing Administration building. Along with the new Library & Academic Resource Center, it will flank the gateway to the campus from Fulton Entry and should match the scale and presence of the Library for formal balance.

The building shall have multiple access points which all converge to an atrium that rises through the second floor. Community related program should also be located in the first floor with presence from the street side to be easily accessible. Administrative offices and student related functions are recommended to be in the second floor.

An outdoor patio for community, foundation, and administrative events is desired for the second level and may be designed as a green roof.

American Society of Landscape Architects Headquarters
Washington, DC

UCSD Prince Center
San Diego, California

Harbor College Student Services
Harbor City, California

ARCHITECTURE

Campus Center

BUSINESS TECHNOLOGY BUILDING (CAMPUS CENTER RENOVATION)

57,967 ASF / 83,552 GSF

The Campus Center will be renovated to become the Business Technology Building which will be the home to Business, Computer Applications and Office Technology, and Computer Science Departments.

Space vacated by the bookstore that moves to the Monarch Center, and office suites that move to Student Services, will be converted into laboratory spaces for instruction.

It is desired that some walls in the second floor be taken down to create larger rooms to accommodate computer labs, pending available funding.

Monarch Hall will be renovated to address existing concerns of lighting, acoustics, visibility, and functionality.

Monarch Hall

MIT Classroom
Massachusetts

ARCHITECTURE

PLANETARIUM BUILDING EXPANSION

2,920 ASF / 4,000 GSF

This expansion to the existing planetarium building shall include an instructional space, offices and support spaces, and a 40' diameter dome observatory on the roof.

Design of surrounding buildings, landscaping, and lighting should be sensitive to the planetarium's function and not obstruct sky visibility.

Planetarium

Planetarium

ARCHITECTURE

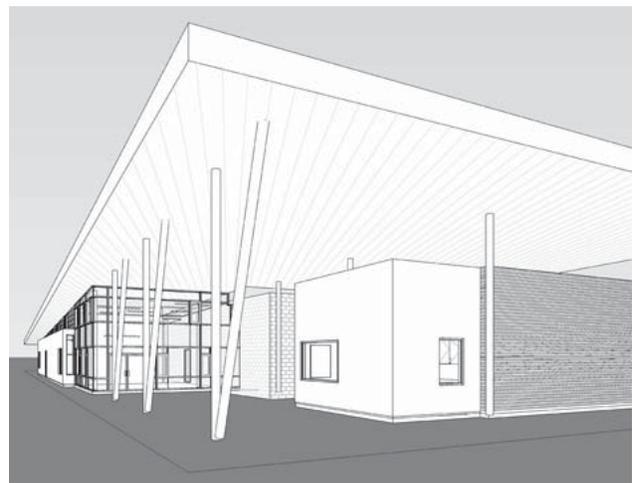

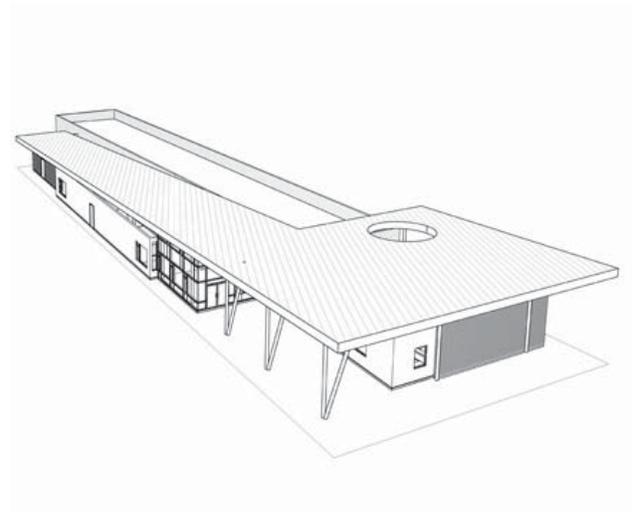

Monarch Stadium / Track & Field

ATHLETIC TRAINING FACILITY

11,700 ASF / 18,000 GSF

Prominently located in the center of the PE / Athletics complex, this building holds the responsibility of welcoming students, athletes, and spectators. It should be designed as a backdrop to both outdoor spaces it fronts: the Athletic Events Plaza and Monarch Stadium. Signage and graphics are ideal for this buildings.

Schematic Design Rendering
LVC Media Arts / Performance Arts Center

ARCHITECTURE

MULTI- PURPOSE COMMUNITY SERVICES CENTER

17,000 ASF / 20,000 GSF

A new building for Community Services that currently utilizes the Gymnastic center and a few bungalows will be located adjacent to the Athletics Events Plaza. This location takes advantage of proximity to drop-off locations away from heavy traffic for safety, and athletic fields for outdoor activities.

Supplementary to the various indoor floor areas within this building, a courtyard with a photovoltaic overhead canopy shall be incorporated for outdoor activities.

Biblioteca Central Estatal Wigberto Jiménez Moreno
León, Guanajuato, Mexico

The College at Brockport
Brockport, New York

ATHLETIC FIELDS

ATHLETIC FIELDS

The baseball field shall be reoriented and shifted to take over parking Lot F which is currently underutilized. This will allow for the two softball fields to be relocated next to the baseball field with possibility of sharing facilities along with the football practice field and javelin.

A running track of decomposed granite will loop around the athletic fields. This will be accessible by the general community to promote fitness and wellbeing.

The existing mound of earth that was leftover from the excavation of the pool will be leveled to provide enough room for a field to be used by shotput, hammer, and archery.

Monarch Stadium

Baseball Field

Football Practice Field & DG Running Track

LANDSCAPE OVERVIEW

As caretakers of higher learning, the faculty and staff of Los Angeles Valley College understand the ability of landscape to foster and nourish an environment of learning. In part, their understanding is due to the richly landscaped setting within which they practice. But as educators foremost, they have taken the opportunity to expand the role of landscape on campus and take their campus to the forefront of sustainable and regionally sensitive landscape and site design. With the improvement and guidelines proposed in this master plan, the campus landscape will serve not only as a better backdrop for an academic community, but also as an educational tool and model for future campuses and for the greater community as a whole.

Seating Area

Monarch Square

GOALS

The landscape master plan for LAVC is as practical as it is visionary. To fully realize a campus master plan, designers and planners must have a clear set of goals that establish the overall landscape structure, creative direction and programming. The landscape master plan follows the following set of goals:

- **RESPECT, IMPROVE, and CONNECT** to existing campus spaces and identity. The college has a robust landscape structure and identity. Improvements are necessary, but structure of certain iconic areas, such as the “J” and urban forest, should be preserved and enhanced. New areas should integrate and connect to the existing structure.
- **FOSTER** a comfortable, healthy, and nourishing environment for building a robust academic community year after year. The comfortable climate of Southern California puts even more emphasis on the function of outdoor spaces in a college environment. The campus landscape should always seek to create spaces that foster community and learning. Spaces should always focus on comfort, interaction, and attractive identities.
- **RECONNECT** the campus with its regional natural history and the Tujunga Wash. As a place of learning, LAVC has a great opportunity to demonstrate to its students and community the natural history of the area, especially through a celebration of Tujunga Wash. The site also has suitable topography and can integrate this concept into sustainable design and the creation of iconic spaces. Ultimately, by reconnecting with regional natural history, the college can be an advocate and example of environmentally-sensitive living.
- **PROMOTE** sustainable technologies and landscape to become a leader and educational center for sustainable practices. The campus will seek to become a model of sustainable design practices. As such it can become a leader, educational center, and advocate in the field.
- **INTEGRATE and ORGANIZE** campus internally and with neighborhood; improve connections between Academic, Sports, and Community. The campus structure should seek to make strong connections between all of these components, encouraging a stronger community and better campus experience.

LANDSCAPE MASTER PLAN

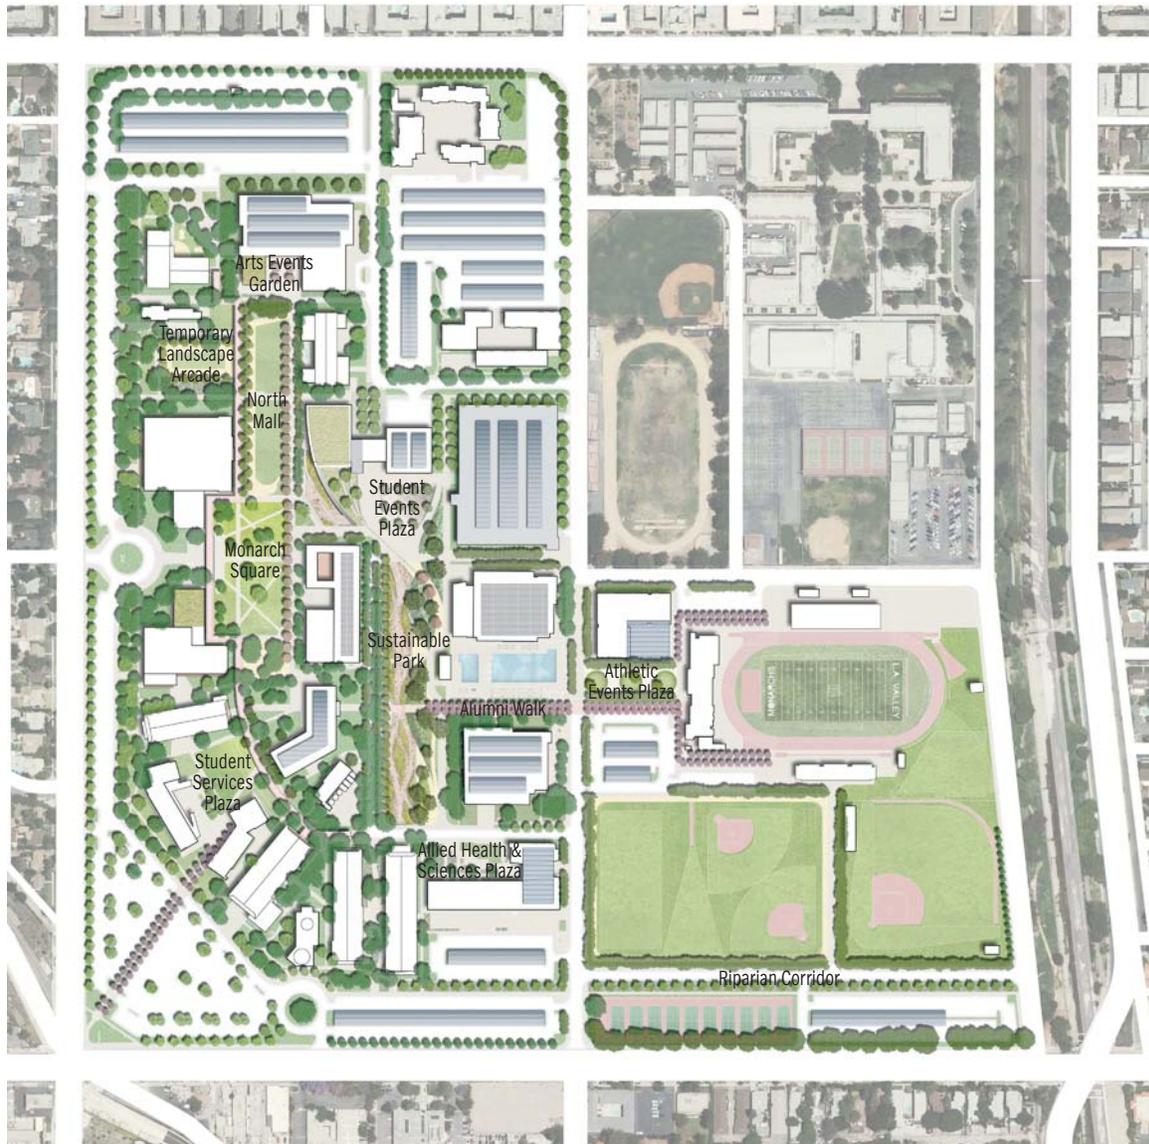

Figure 3.10 Illustrative Landscape Plan

LANDSCAPE MASTER PLAN

Figure 3.11 North Mall / Arts District

NORTH MALL / ARTS DISTRICT

With the addition of a new Performance Arts and Media Arts buildings capping the end, the North Mall area solidifies itself as the Arts District. In this area the existing landscape is retrofitted for better utilization and sustainable practices and new plazas are added to service the cultural locus.

LANDSCAPE MASTER PLAN

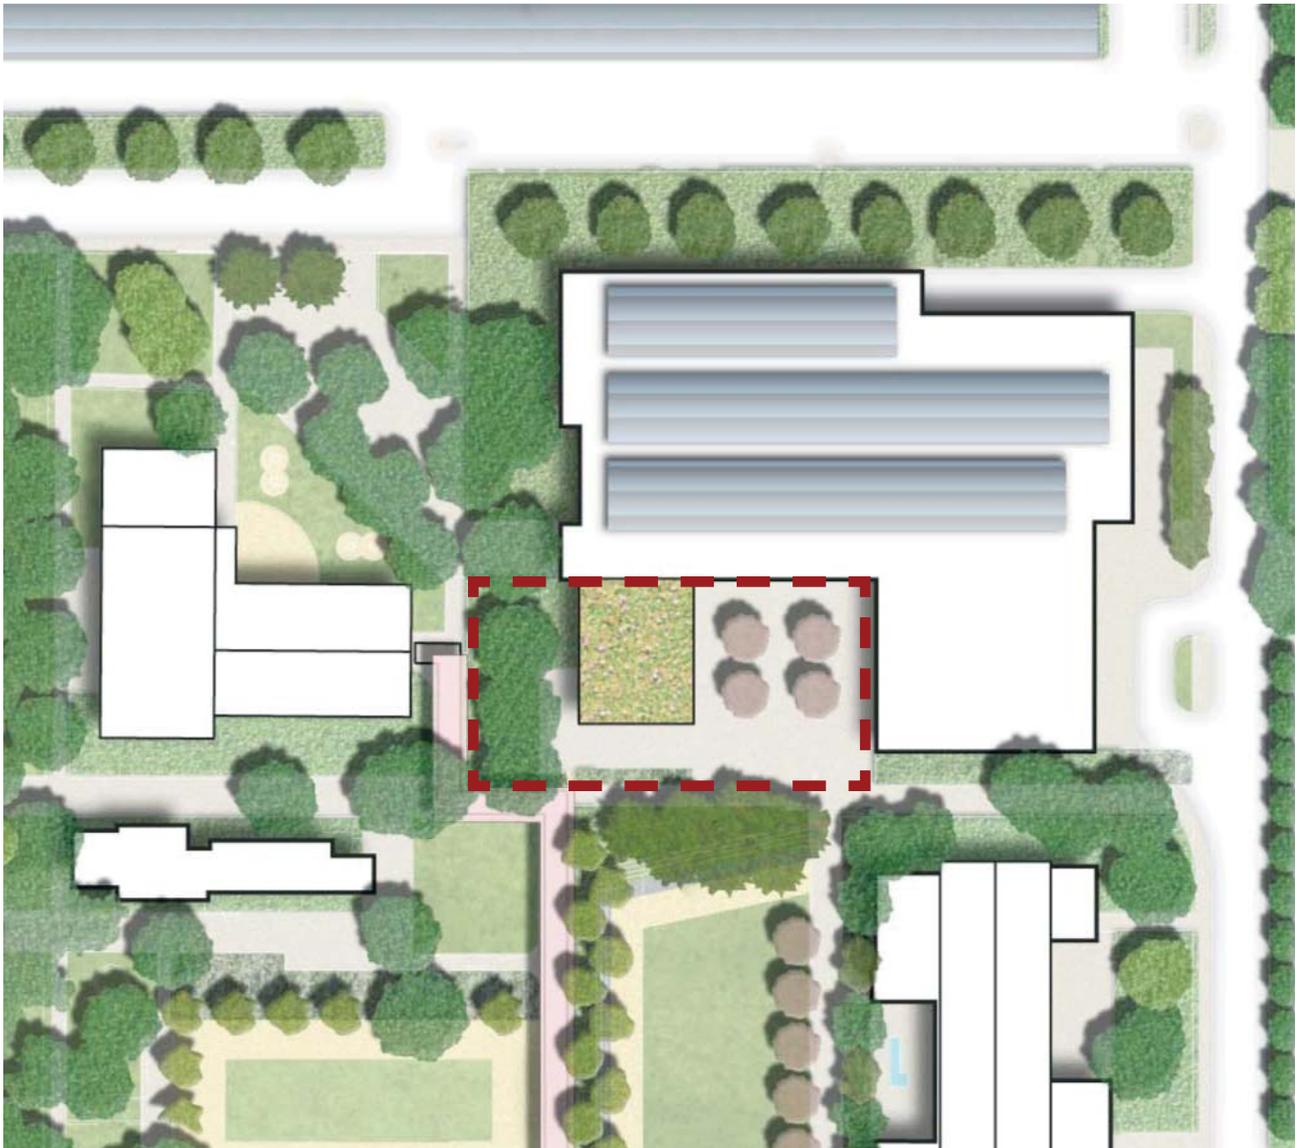

Figure 3.12 Arts Events Garden

ARTS EVENTS GARDEN

An Arts Garden Plaza to cap the north end of the central mall. Due to topography, this area would be integrated with the stepped seating and could also include a small amphitheater for outdoor events.

There is a desire to have public art installed throughout the campus per the recommendations of the College's Arts Committee

LANDSCAPE MASTER PLAN

Figure 3.13 Temporary Landscape Arcade

TEMPORARY LANDSCAPE ARCADE

A Temporary Landscape Arcade that is flexible space for program and serves as a placeholder for a future building. Students and faculty could use this space for temporary installations and events.

This area is intentionally land banked as a future building site therefore the landscape and site improvements should be designed accordingly.

LANDSCAPE MASTER PLAN

Figure 3.14 North Mall

STEPPED NORTH MALL SEATING

Stepped seating and decomposed granite paving along the slope adjacent to central mall. These improvements will reduce water use and increase use by students.

Figure 3.15 North Mall Perspective Rendering

Swarthmore, Pennsylvania

LANDSCAPE MASTER PLAN

Figure 3.16 Valley College Creek

VALLEY COLLEGE CREEK

With the majority of the water draining northwest to southeast, a narrow riparian feature on the east side the mall will collect and treat storm water and ultimately connect to the Tujunga Wash, both symbolically and functionally.

LANDSCAPE MASTER PLAN

Figure 3.17 Student Services Plaza

Figure 3.18 Student Services Plaza Section

STUDENT SERVICES PLAZA

The student services lawn transforms the constraint of a partially submerged maintenance tunnel into an asset by creating a sloped lawn that serves to hide the tunnel and create an attractive gathering space and landscape feature. The sloped lawn becomes an attractive seating area and open space relief in this otherwise congested portion of the campus “J”.

Figure 3.16 Rendering of Student Services and Annex

LANDSCAPE MASTER PLAN

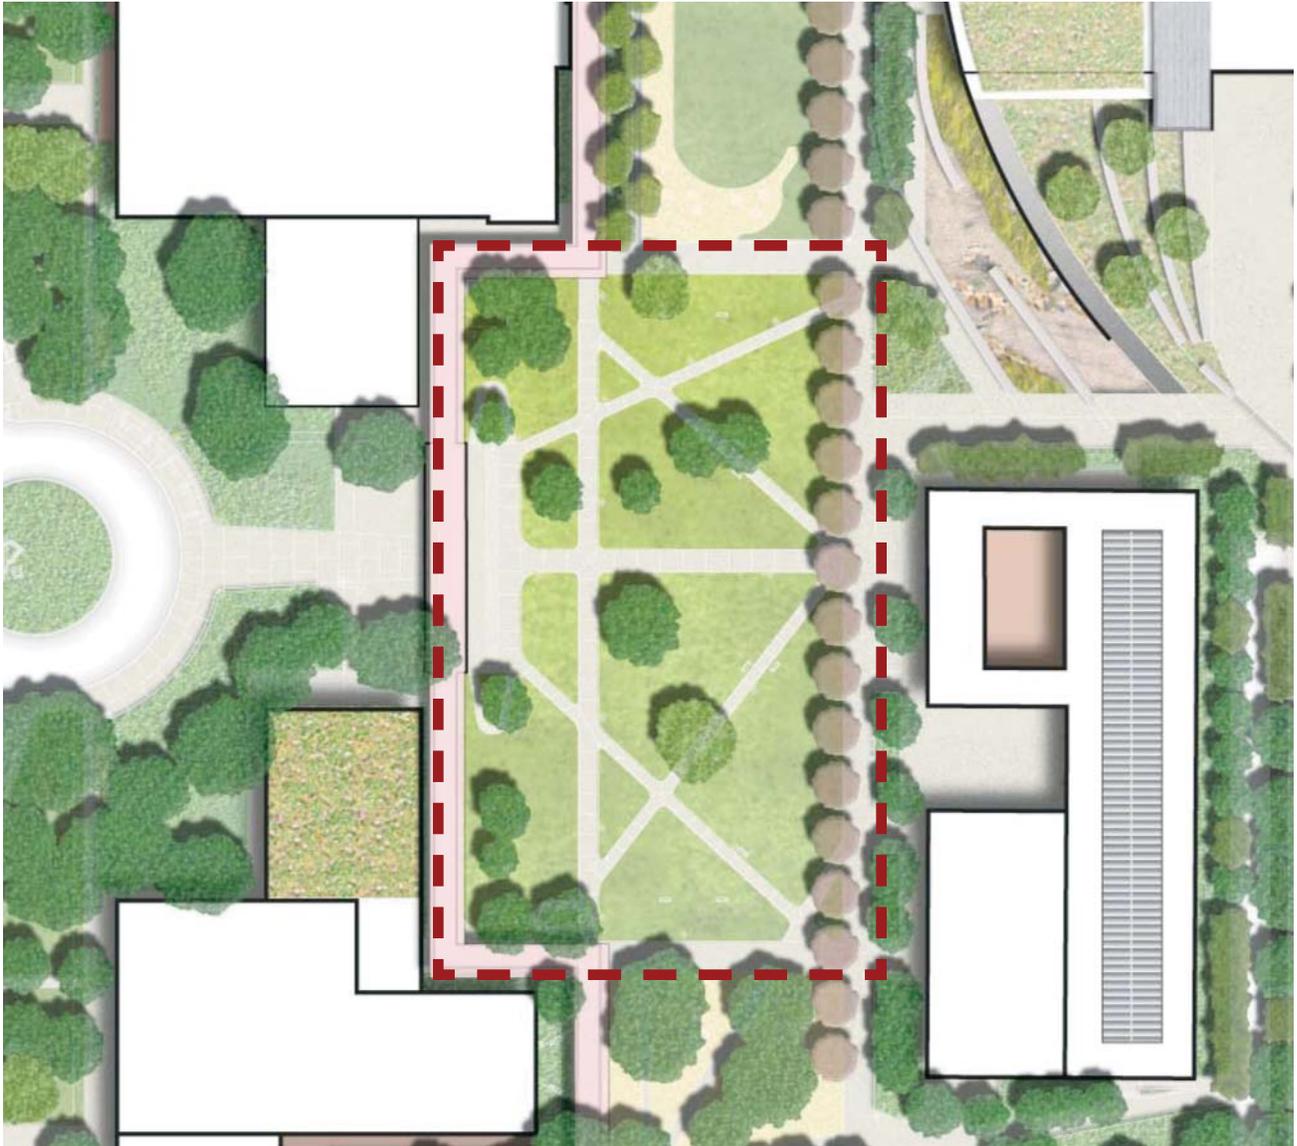

Figure 3.19 Monarch Square

MONARCH SQUARE

Monarch Square has been recently improved and has an established identity. With the maturation of the newly planted trees, it will continue to improve. Care should be taken to improve and learn from the function and maintenance of the newly planted and paved areas.

Pathway at Monarch Square

LANDSCAPE MASTER PLAN

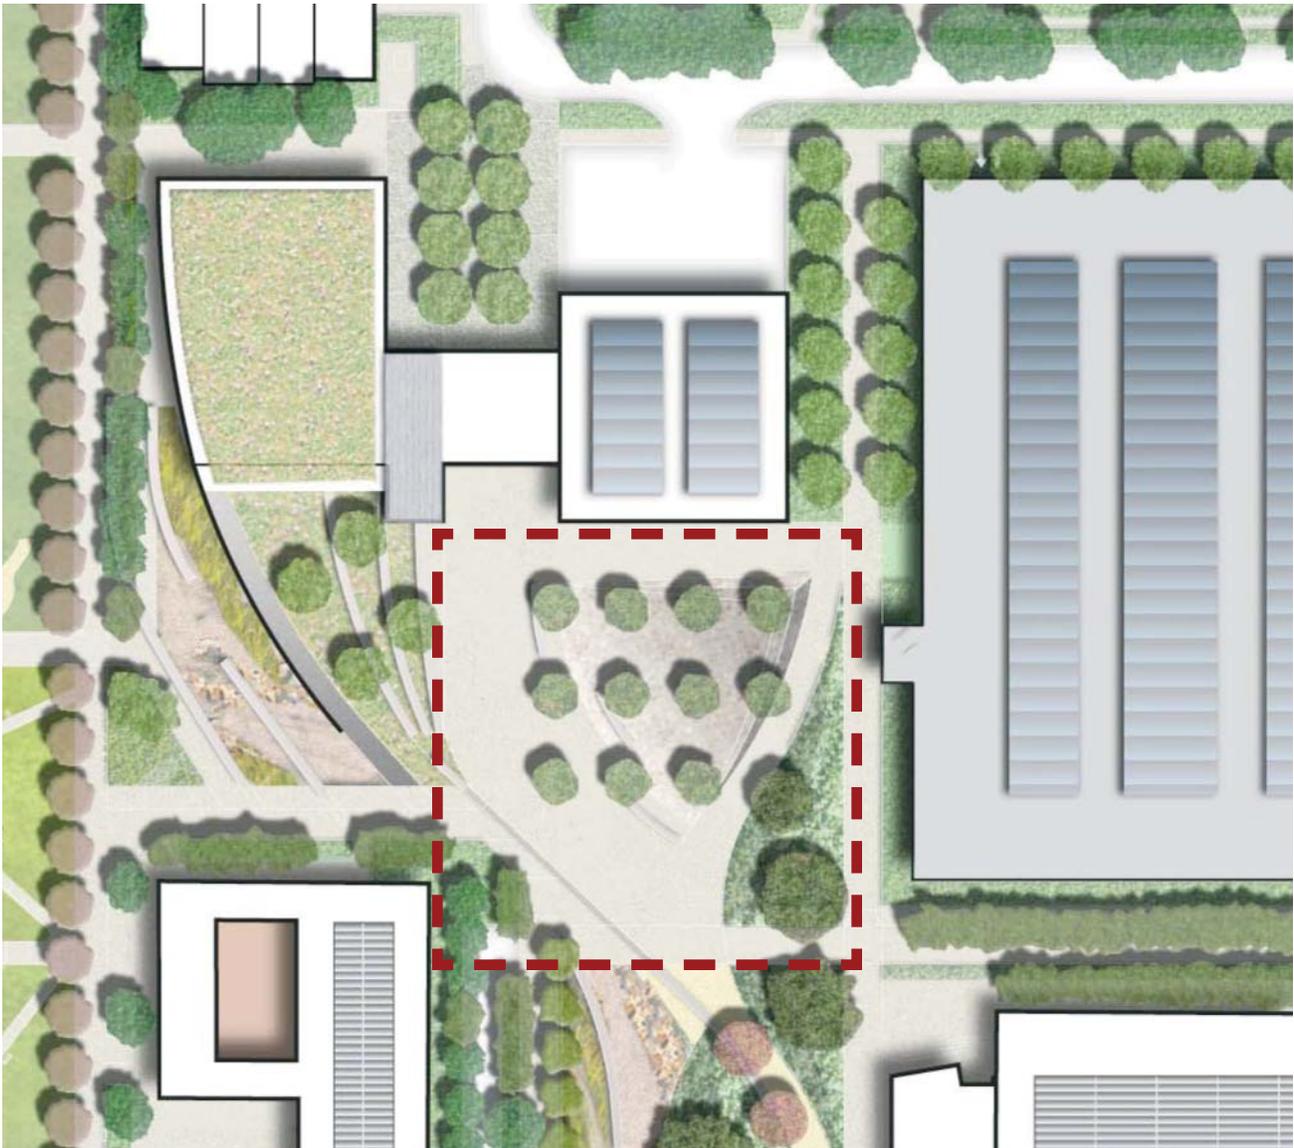

Figure 3.20 Student Events Plaza

STUDENT EVENTS PLAZA

As an end cap to the Sustainable Mall, entrance to the new Parking Structure, and bridge between the new and old campus landscapes, the Student Union Plaza is strategically located to become an important center of campus culture. The Plaza builds its identity with an integration with the Valley College Creek, a potential natural water treatment system, and a Student Union with landscape features. Here students can enjoy the new landscape features and amenities in the company of their friend and faculty.

LANDSCAPE MASTER PLAN

Figure 3.21 Student Events Plaza Perspective Rendering

LANDSCAPE MASTER PLAN

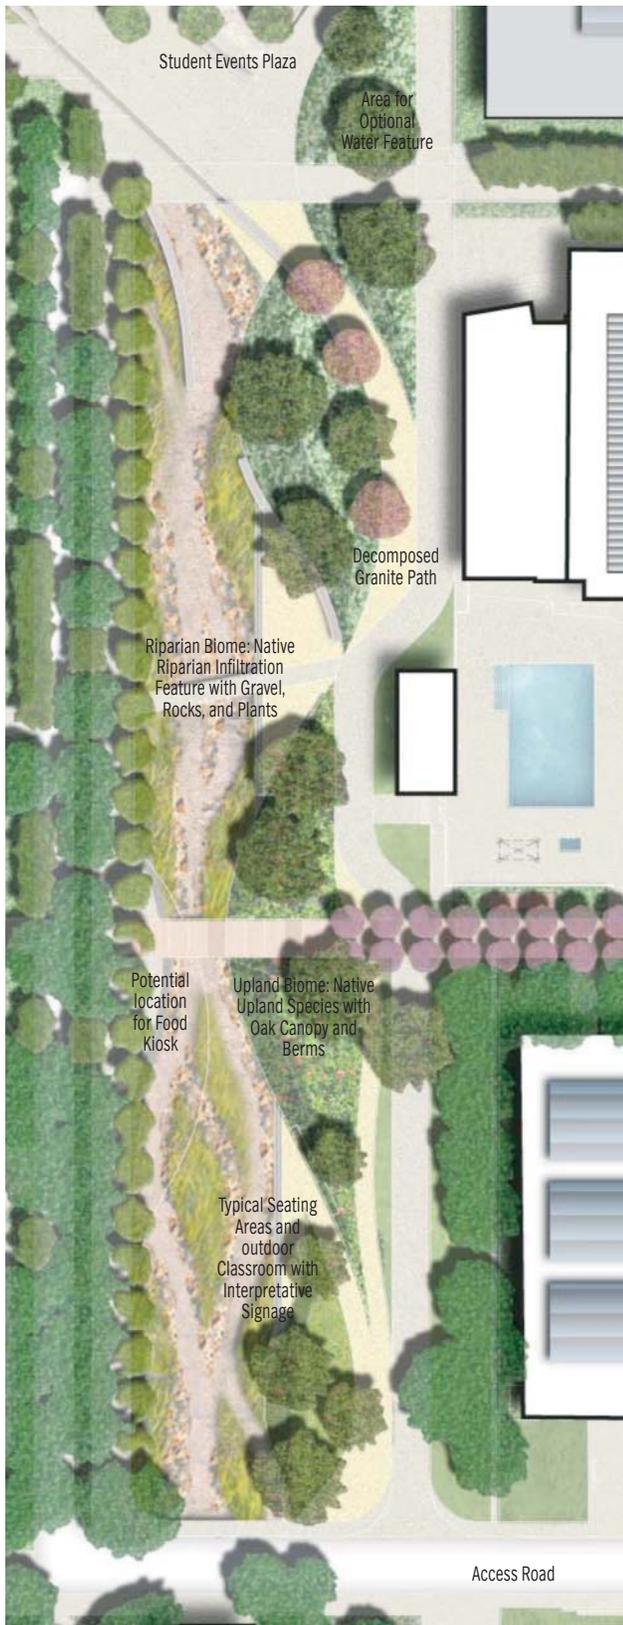

Figure 3.22 Sustainable Mall

SUSTAINABLE MALL

The sustainable mall mirrors the existing Central Mall, but with a focus on regional natural history and sustainable technologies. Here, the Valley College Creek widens to fit a rich riparian infiltration area that runs adjacent to landforms planted with an upland habitat. Between the landforms and the edge of the Creek area, outdoor seating areas can be used casually or as outdoor classrooms.

Currently the campus storm water and runoff drains, without any treatment or awareness, directly into the Tujunga Wash, exacerbating the poor water quality in the wash and wasting a valuable resource and its many potential benefits. The topography of the college is ideally suited to reverse this paradigm and make a sustainable stormwater system a central element in the campus' identity. The proposed plan unearths the stormwater system and creates the Valley College Creek that runs from the north end of the campus all the way to the Tujunga Wash. Along the way, a central Sustainable Mall features a large infiltration wash and creates a rich local habitat and park setting. In terms of stormwater quality, the new system seeks to treat and infiltrate all stormwater, making it available to the local vegetation and reducing stress on Tujunga Wash.

LANDSCAPE MASTER PLAN

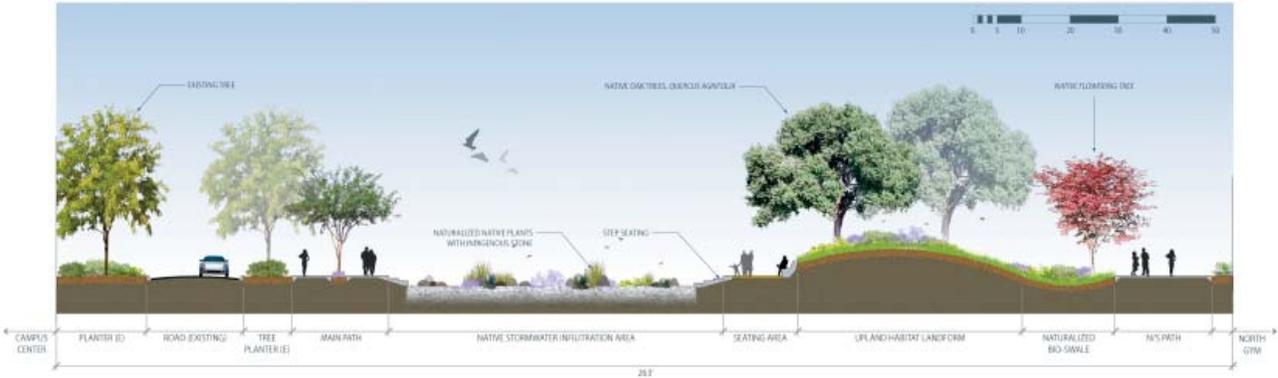

Figure 3.23 Sustainable Mall Section

Figure 3.24 Sustainable Mall Perspective Rendering

LANDSCAPE MASTER PLAN

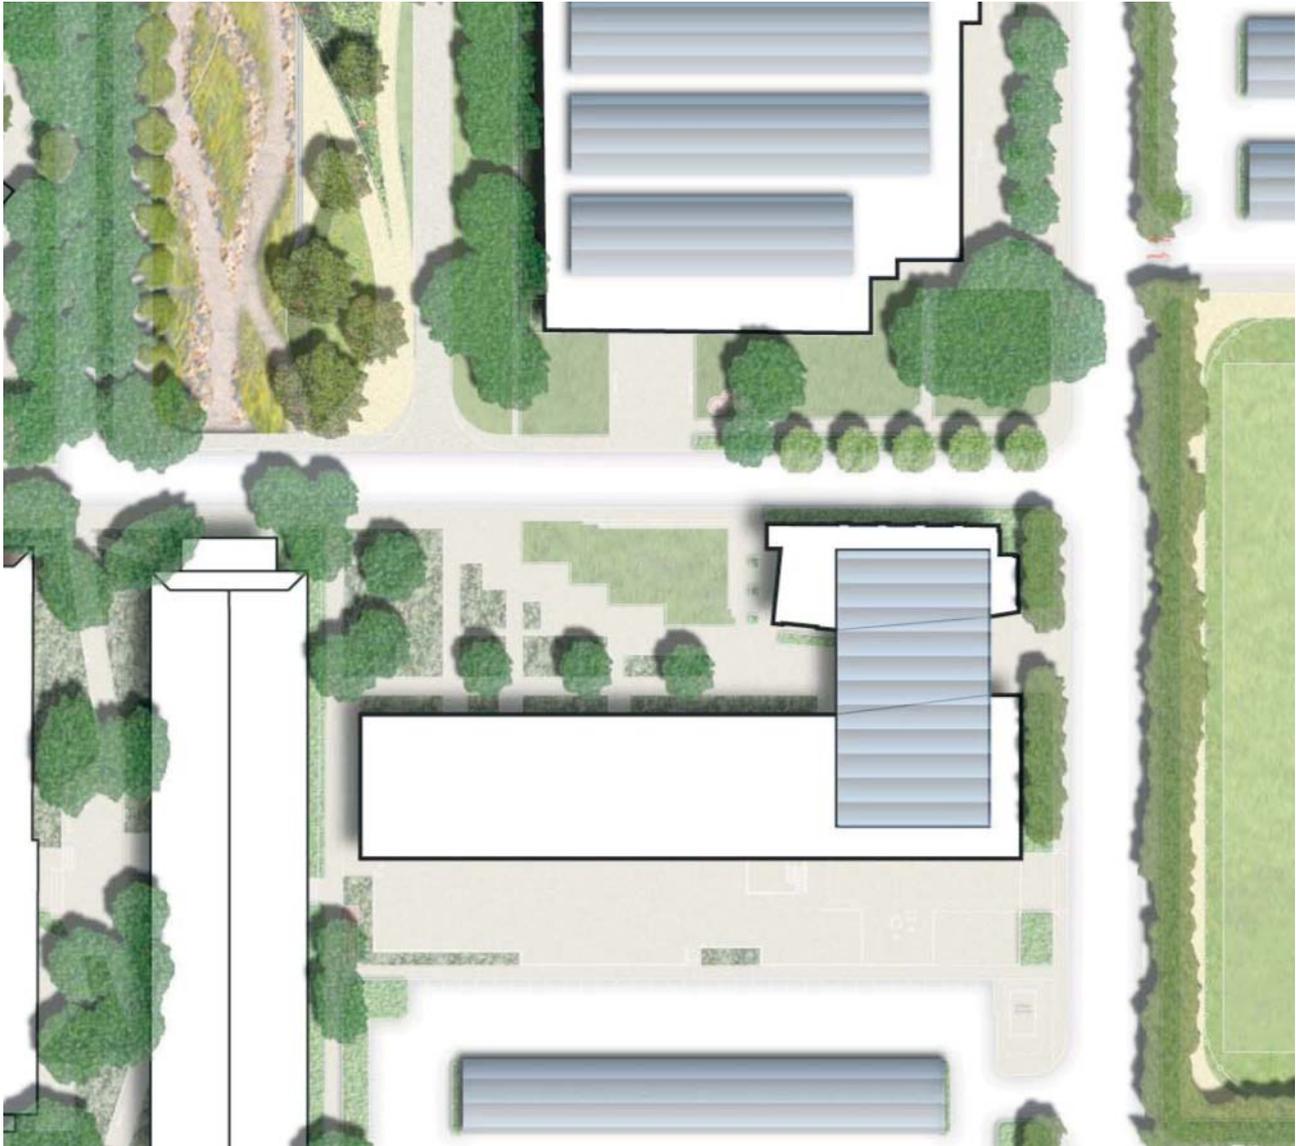

Figure 3.25 Allied Health & Sciences Plaza

ALLIED HEALTH & SCIENCES PLAZA

The Allied Health Plaza was recently completed and has an established identity. With the maturation of the newly planted trees it will continue to improve. Care should be taken to improve and learn from the function and maintenance of the newly planted and paved areas.

LANDSCAPE MASTER PLAN

Figure 3.26 Tujunga Wash Connection

Existing row of trees

Tujunga Wash

RIPARIAN CORRIDOR/TUJUNGA WASH CONNECTION

The southeast reach of the Valley College Creek makes the critical link between the Sustainable Mall with Tujunga Wash. This section builds on existing tree plantings , adding an exposed riparian feature and a walking path that connects the campus with the green space adjacent to the Tujunga Wash. This connection could be celebrated with a gateway element and encourages the use of alternative transportation and exercise.

Note that the eastern area of the parking lot has remained void of photovoltaics to accomodate the entertainment industry vehicles that use this lot to stage films,etc.

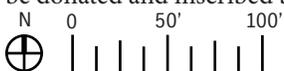

LANDSCAPE MASTER PLAN

Figure 3.27 Alumni Walk

ALUMNI WALK

Alumni Walk situates itself to become a valuable component of campus identity and culture. With the addition of decorative landscaping including flowering trees, the once neglected link between the Academic and Sports sections of campus becomes a celebrated connection that enhances day-to-day use and becomes a ceremonial element during graduation and sports events. The walk would include landscape elements such as paving or benches, that could be donated and inscribed by Alumni.

LANDSCAPE MASTER PLAN

Figure 3.28 Alumni Walk Section

USC Bloom Walk
Los Angeles, CA

Penn State Alumni Walk
Pennsylvania

LANDSCAPE MASTER PLAN

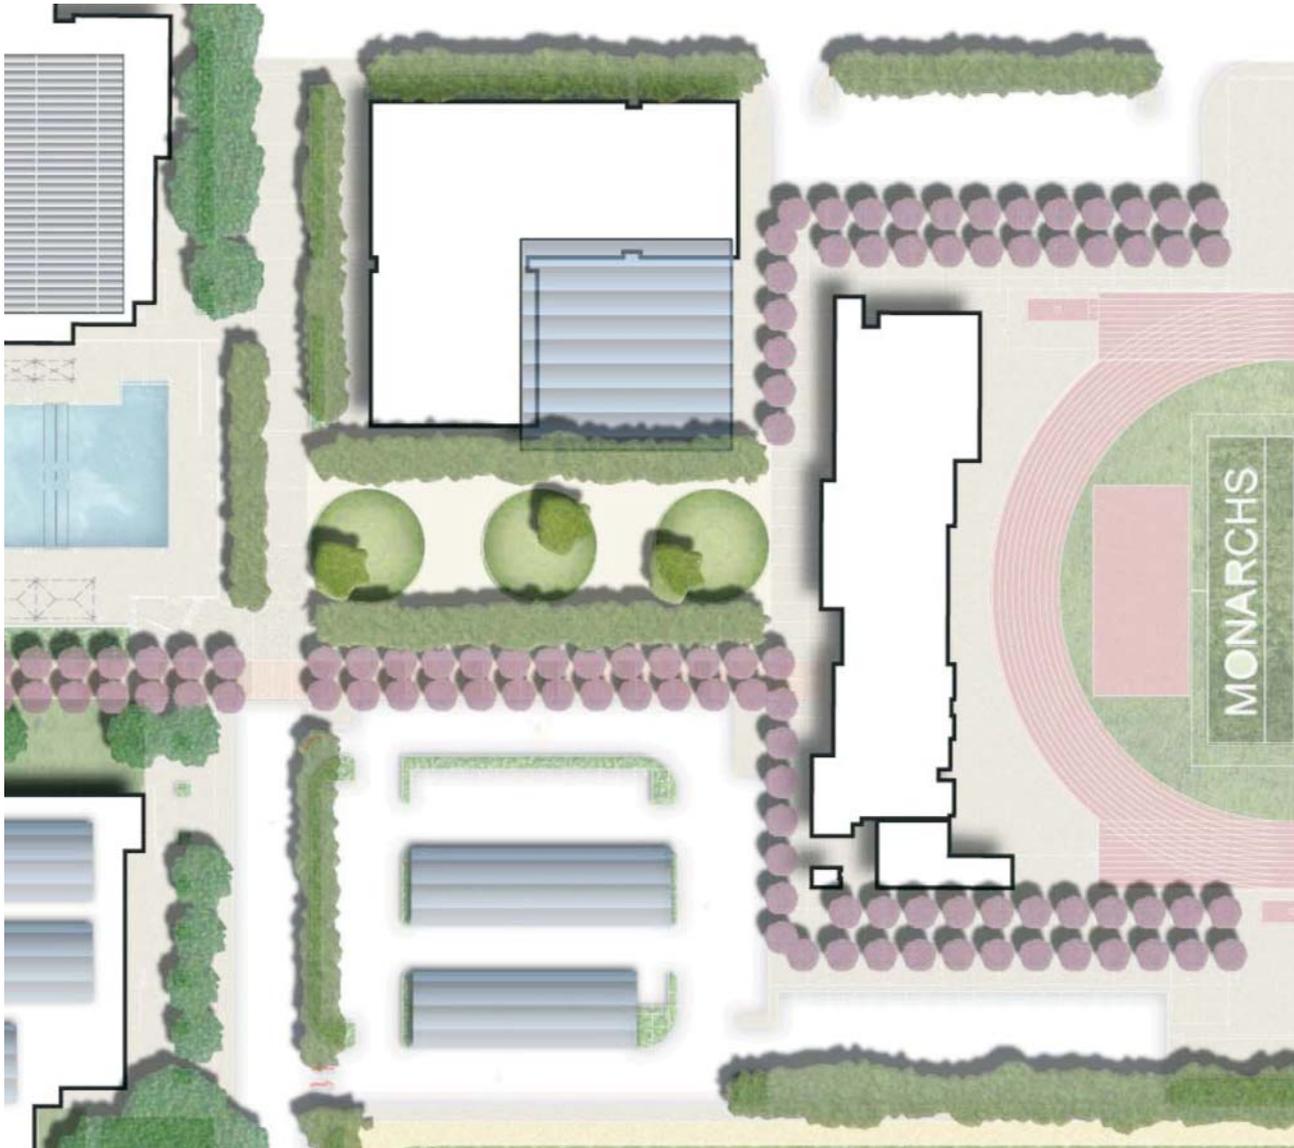

Figure 3.29 Athletic Events Plaza

ATHLETIC EVENTS PLAZA

As the front door for the Athletics Facility and Stadium and new Community Services Center, the Athletics Plaza is an important new public space on campus. The plaza serves the athletics program as a day-to-day social space and place for athletics rallies and pre- and post-game activities. Landscape features at the center organize the plaza, serve as a stage, and enable students to meet and find each other during large

events. The Alumni Walk is integrated to complete the ceremonial procession into the stadium for graduation services.

There is a desire to improve the entries to the home and visitor sides of the football stadium, particularly the home side. Ideally, this is addressed during the design of the Multi-Purpose Community Services Center.

EXISTING PALETTE

The existing palette defined in the previous Aesthetic Guidelines will continue to be applicable. However, because of the lack of color in the palette, most new projects have been introducing their own accent colors. The goal of the Aesthetic Guidelines update in this master plan is to give coherence to existing colors and unify the campus, but at the same time allow for some variation between buildings.

**Color swatches and material images included are for reference only. Refer to actual material samples for true color/texture/scale.*

MATERIALS AND COLOR

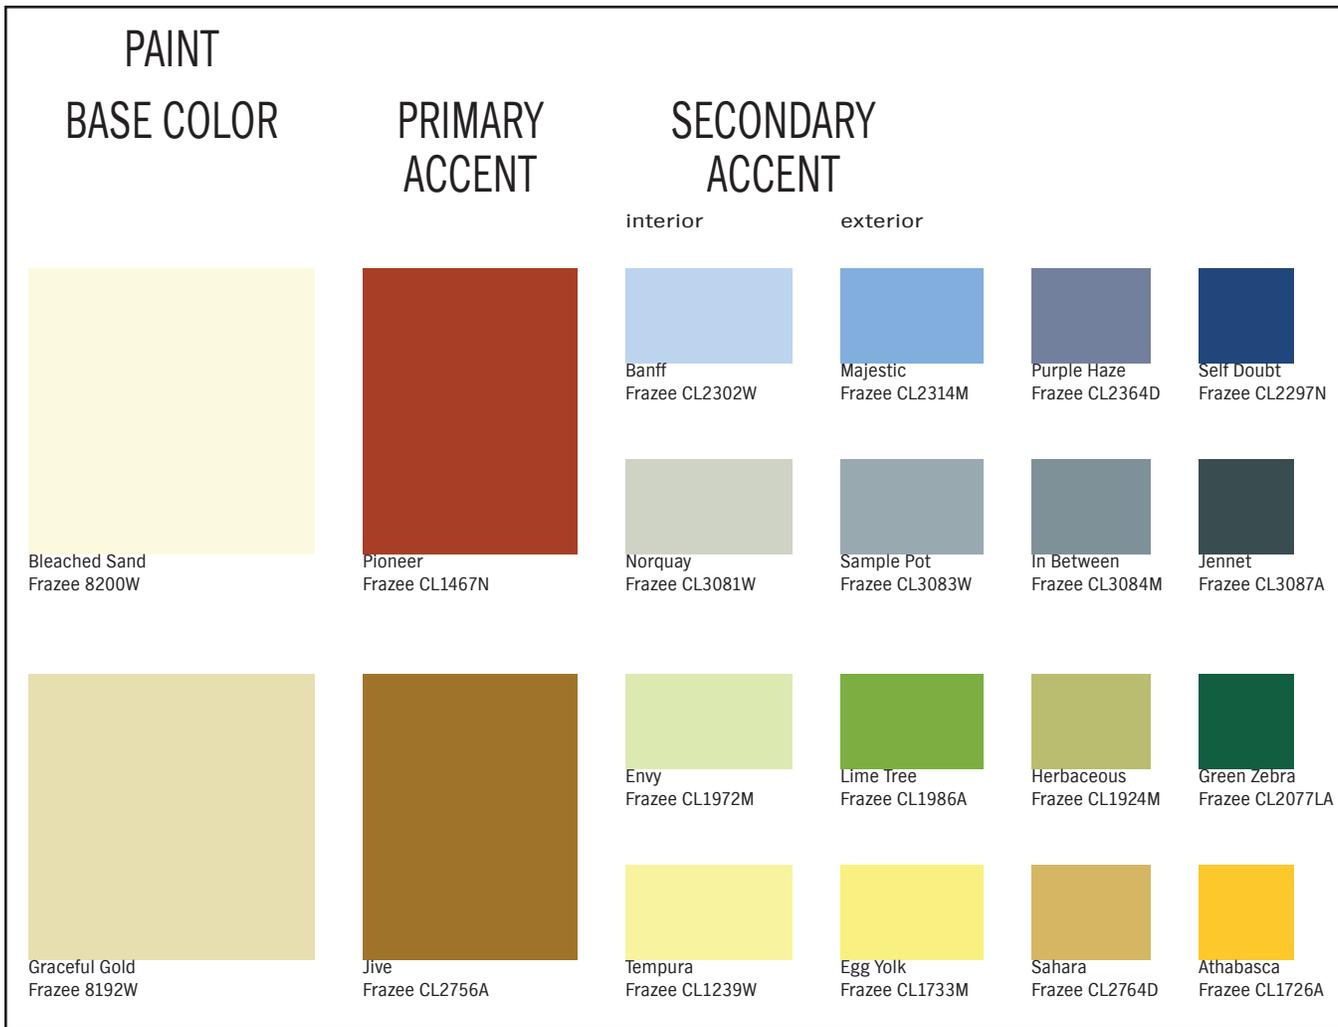

Figure 4.1 Master Plan Update Building Color Guideline

ACCENT COLOR GUIDELINES

Paint colors to be used on new buildings shall conform to those identified here. If painted, buildings will primarily be of either one or both of the base colors. Large accent areas may use one of the primary accent colors. Exterior secondary accent colors corresponding to the primary accent color selected may be used to accentuate certain portions of the building where articulation is desired.

LANDSCAPE

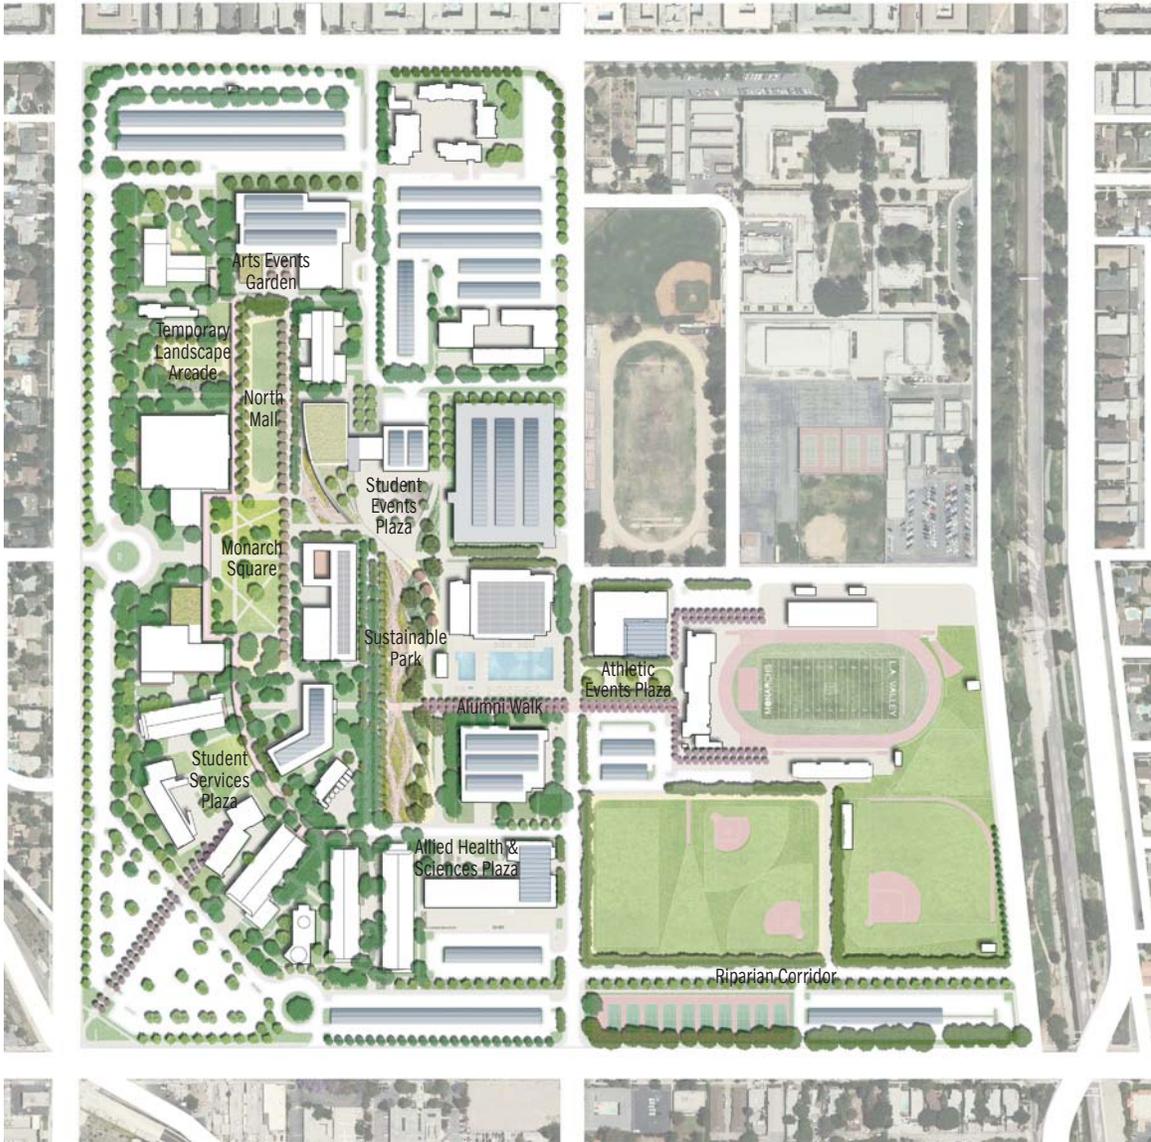

Figure 4.2 Master Plan Update Landscape Places

PLANTING

The following are general guidelines for the future landscape design and implementation.

Climate appropriate approach, both in terms of cooling effects and water-use considerations.

1. Plantings should be water-wise and consider regional water availability. It should be noted that drought tolerant planting is not always appropriate. Some exceptions include:

- Plants adjacent to lawn, water features, or specific microclimates.
- Plants irrigated with recycled water.
- Plants used to strategically reduce thermal stress.

Native and natural history focus, emphasizing connection with indigenous landscape systems, including habitat creation and educational potential.

1. When possible, plantings should focus on particular biomes and creation of specific, diverse, and viable regional habitats. The more local, the better. The bigger, the better.

2. Native plantings could also be organized by an educational concept.

3. Native plantings should be planted with care and careful consideration. When use, watering regimes, or other urban impacts would be too great, an alternate Mediterranean palette may be more suitable.

Maintain and enhance college identity.

1. Each landscape area should be unified by a palette of plants that is either native or organized by a specific Mediterranean regional palette.

Seasonal interest.

1. Plantings should consider seasonal interest during the Academic Calendar, with particular emphasis on the beginning of semesters and graduation services.

Maintenance considerations.

1. Consider density and complexity of planting and subsequent maintenance requirements. Fewer plants with larger spreads could be easier to maintain than high density planting of smaller plants.

2. Consider maintenance needs and access to plants. Larger planting areas could benefit from improved maintenance access to minimize the compaction of soils and an eventual thinning of plantings.

3. Employ weed control fabric where possible.

4. Lighter colored (to avoid excess heat build-up) gravel can be an effective as mulch. It is easy to clean with a blower, attractive, and long-lasting.

5. Areas with turf should be planted to accommodate a 72" wide ride-on lawn mower. When possible, slopes should be designed to accommodate this lawn mower.

Refine and select final tree palette and planting plans based on "Tree Master Plan", via collaborative effort of Landscape Architect and Arborist.

1. Place and plant trees to maintain and sustain a long term vision of the Los Angeles Valley College urban forest.

2. Ensure all planted trees have sufficient root volumes and space for mature growth.

3. Use mulch rings to improve tree health in terms of water retention, competing plantings, and protection from lawn equipment.

4. Consider the quantity and type of leaf, flower, and fruit drop and proximity to paths, under plantings, etc.

5. Plant trees as shading mechanisms for human comfort and reduction of Heat Island Effect. Plants on the West and Southwest sides of building and paths will provide maximal shade during peak temperatures of the day.

PLANTING

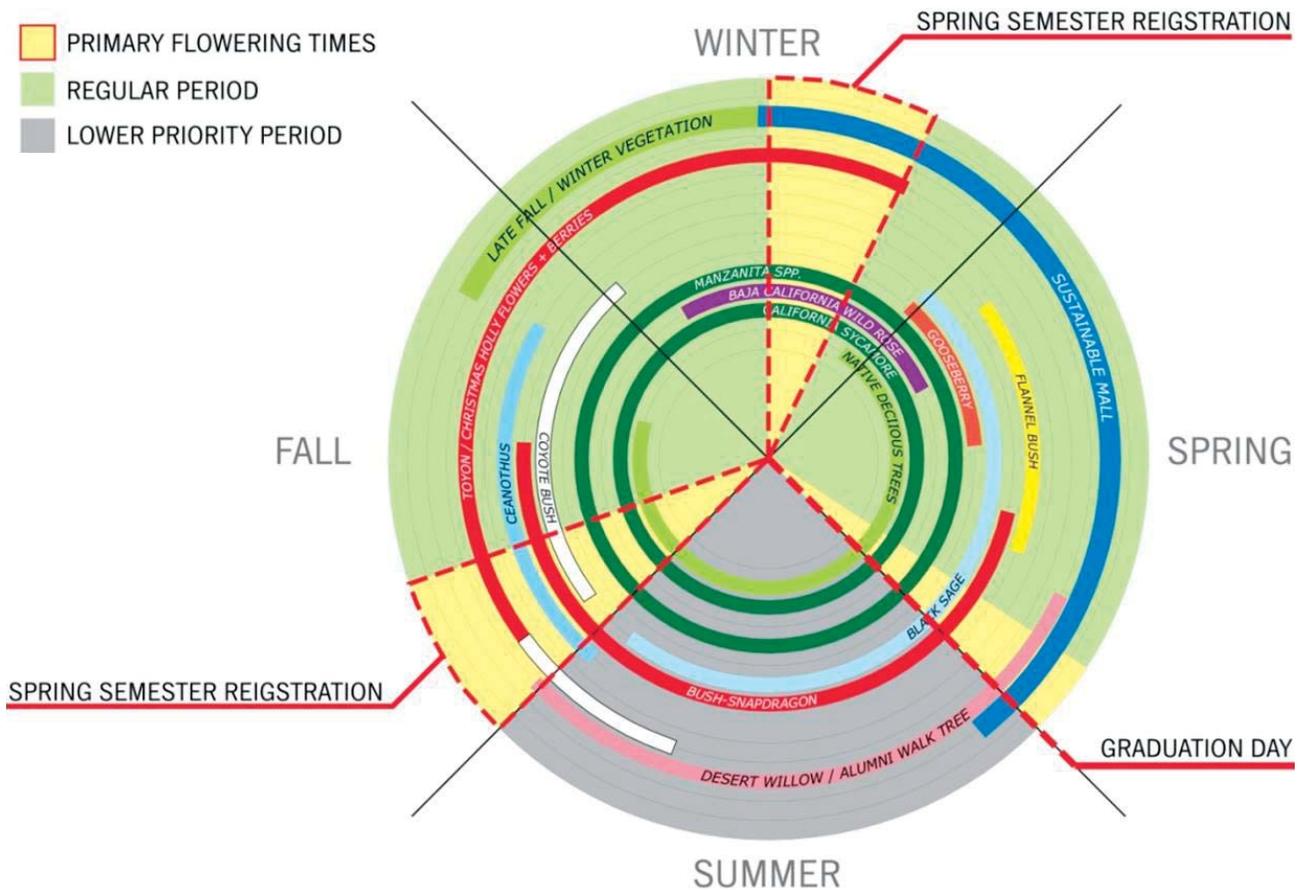

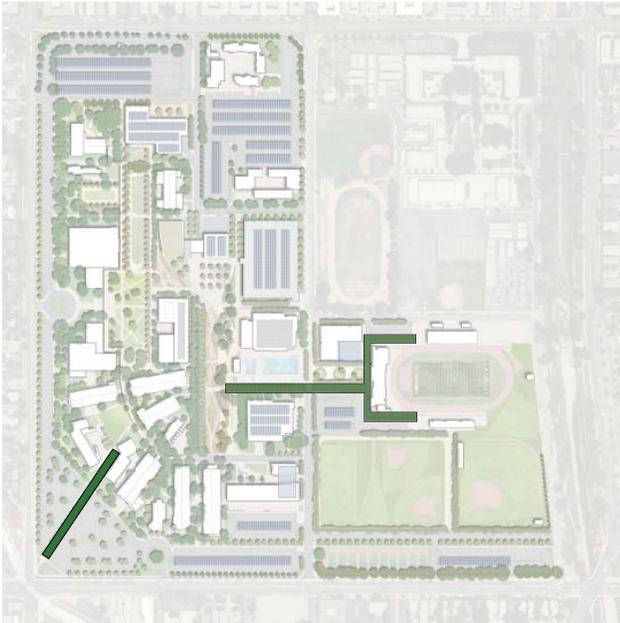

Figure 4.3 Master Plan Update Plant Selection

6. When possible, plant trees with low VOC emission.
7. Balance criteria of tree choice for each area between factors of water use, comfort & cooling, iconic & cultural impact, maintenance, and habitat potential.
8. When possible, the viability of plant selections should be confirmed by observing existing plantings of the same species and cultivar in the San Fernando Valley.

PLANTING

California Buckeye

Desert Willow

NATIVE FLOWERING

Decorative, native if possible, tree for year-round interest and blooming time around the beginning of June, the time of commencement.

Native Flowering Trees:

- *Aesculus californica*, California Buckeye: April-June flowers, showy bark. Deciduous.
- *Chilopsis linearis*, Desert Willow: May to September flowers. Deciduous. Small multi-trunked tree, specimens up to 30'.
- *Cercis mexicana*, Mexican Redbud: Spring flowering, 12-20'. Deciduous.

Manzanita

Slow-Growing Native Hedges

Arctostaphylos 'Howard McMinn', Howard McMinn Manzanita. Up to 5'-8' high. Moderate growth. Garden tolerant. Excellent foliage and attractive bark. Evergreen.

Prunus illicifolia, Hollyleaf Cherry. Extremely hardy and drought tolerant. Evergreen. Attractive foliage. Fruit attracts birds. Prunes well.

Low Maintenance Native Grasses

Muhlenbergia rigens, Deer Grass.

Juncus Patens, California Gray Rush.

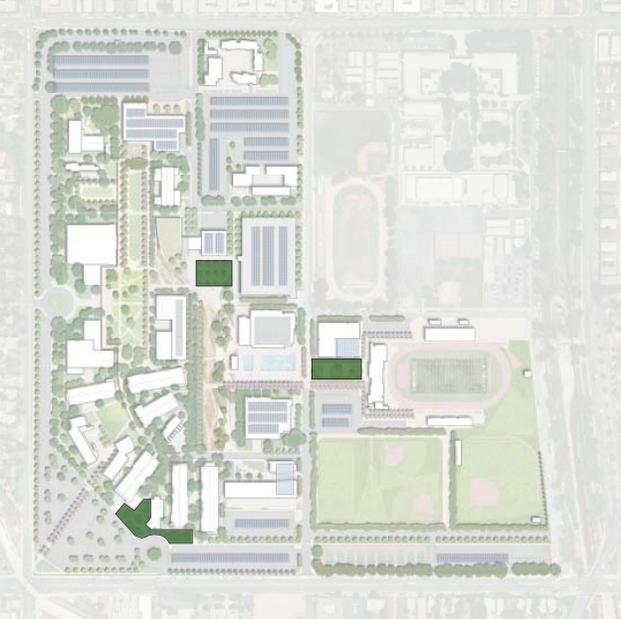

Blue Oat Grass

Milkweed

PLANTING

California Sycamore

California Native Oak

NATIVE CANOPY

Native Canopy Shade Trees suitable for Plazas

Platanus racemosa, California or Mexican Sycamore. Deciduous.

Acer macrophyllum, Big-Leaf Maple. Provides greater shade, but requires greater planting room. Deciduous.

Quercus agrifolia, California Coast Live Oak. Take care for acorn tripping hazard. Evergreen.

Alnus rhombifolia. White Alder. Fast growing, but weak wooded and short lived. Deep shade.

Planters should be planted with low-maintenance native plants.

Big-Leaf Maple

White Alder

PLANTING

RIPARIAN NATIVE

Riparian Tree

- *Platanus racemosa*, California or Mexican Sycamore. Deciduous. Long-lived.

Small Riparian Trees & Shrubs (Reference LA River Booklet)

- *Calycanthus occidentalis*, Spicebush. Riparian native.

Riparian Grasses and Flowers

- *Juncus Patens*, California Gray Rush.
- *Carex Pansa*, California Meadow Sedge
- *Muhlenbergia rigens*, Deer Grass.
- *Sisyrinchium bellum*, Blue-Eyed Grass

California Gray Rush

California Meadow Sedge

Spicebush

California Sycamore

PLANTING

UPLAND NATIVE

Native Canopy Tree

- *Quercus agrifolia*, Coast Live Oak.
- *Juglans californica*, Walnut

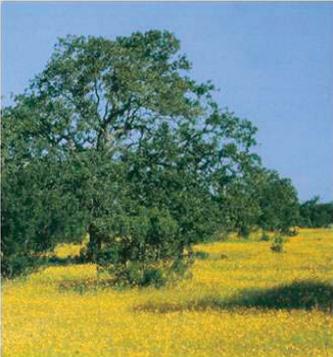

Native Understory Groundcovers & Critical Habitat.

Ceanothus

Milkweed

Native Oak

Manzanita

PLANTING

GREEN ROOF PLANTING

Suitable green roof planting materials. Suggestions to be made by design team for particular roof during design.

Sedum Planted Green Roof

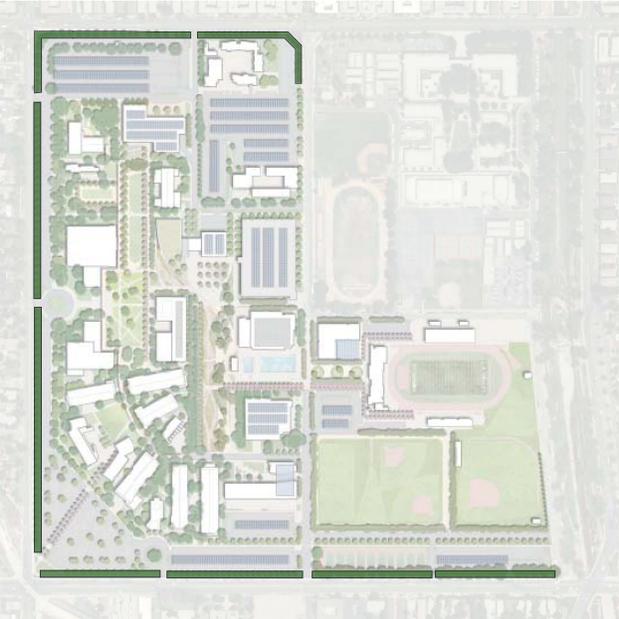

Grass Planted Green Roof

Regional Native Mix

PLANTING

CAMPUS EDGE PLANTING

Recommended replacement for Oleander Hedge

Main Hedge:

- *Arctostaphylos*. Manzanita 'Howard McMinn'. Slow growing, attractive foliage and bark, pink flowering in Winter, low-maintenance, garden tolerant.
- *Rhus integrifolia*, Lemonade Bush. Easier to establish than *Rhus Ovata*. Slower growing than Oleander, but still requiring cutting twice a year. Flowering, plus berries. Hardy.

Border Plant / Highlight

Yellow Flowering:

- *Potentilla fruticosa* "Goldfinger". Dense, bushy, and hardy yellow flowering plant.

Dr. Hurd Manzanita

Lemonade Bush

Bush Cinquefoil

Yellow-Eyed Grass

PLANTING

Existing Mediterranean Planting

Lavender

MEDITERRANEAN PLANTING

The campus has adopted and implemented a mediterranean planting palette and should continue to maintain these areas where they have been successful.

SITE FURNISHINGS

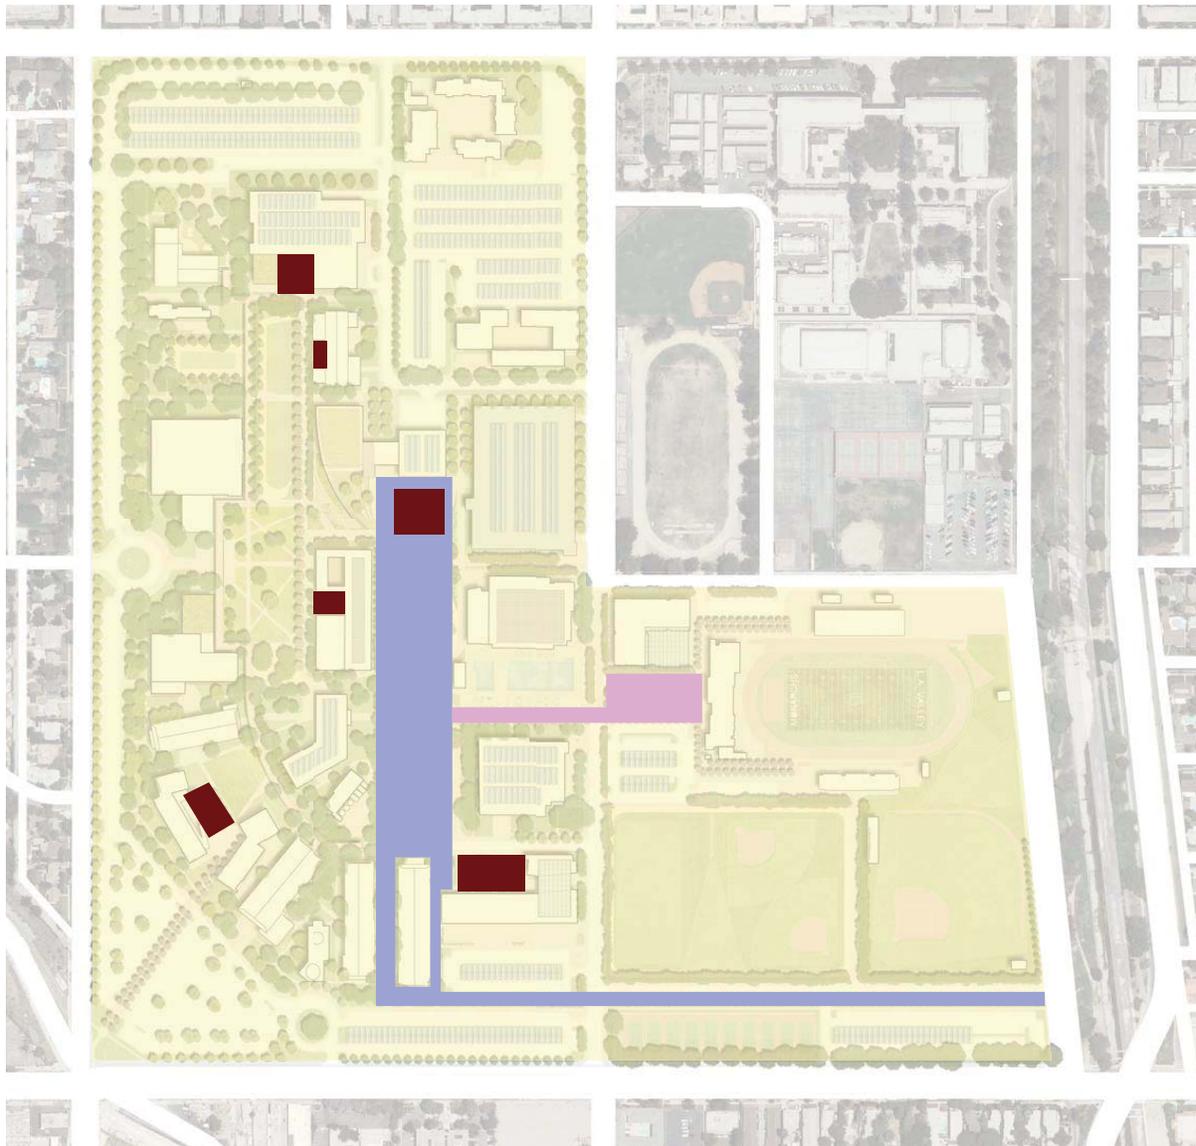

Figure 4.4 Master Plan Update Site Furnishing Zones

The campus has established and implemented an almost complete set of landscape furnishing guidelines. The few new selections recommended build upon and update the established palette and reflect the addition of the Sustainable Park.

- General Campus
- Sustainable Park/Riparian Corridor
- Athletic Events Plaza/Alumni Walk
- Building Plaza/Patio

SITE FURNISHINGS

Existing Concrete Bench

Existing Backed Bench

Sustainable Mall Bench

Alumni Walk Bench

BENCHES

- i. Concrete Backless Benches
- ii. Backed Wood Benches
 - 1. Standard
 - 2. Sustainable Mall (new)
 - 3. Alumni Walk (new)

SITE FURNISHINGS

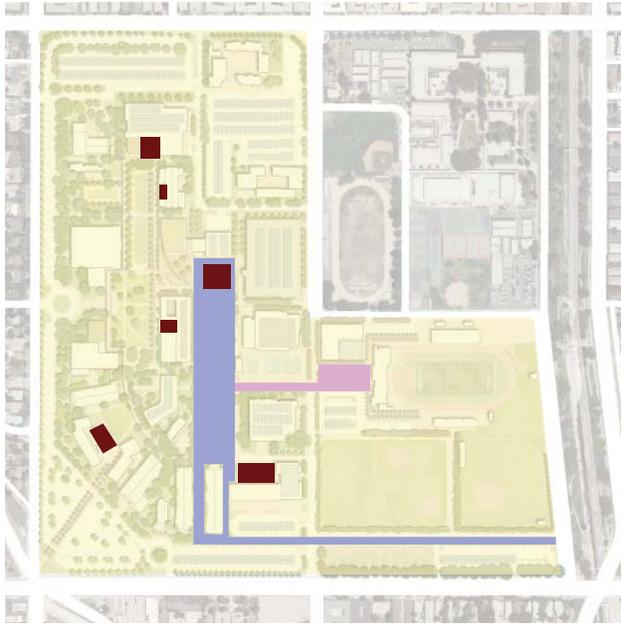

TABLE AND CHAIRS

- i. Concrete, Landscape
- ii. Metal with Fixed Chairs (new)
- iii. Metal and Free Chairs and Tables (new)

Existing Concrete Table and Chairs

- iii. Ash Urns
 - 1. Concrete, Open
 - 2. Concrete, Closed

 Existing Concrete Bins

 Existing Big Belly Bins

 Closed Ash Urn

SUSTAINABILITY

SOLAR HEAT TUBES

LAVC has the largest array of solar heat tubes in Los Angeles. Solar heat tubes use the sun's energy to heat water that can then be used for various energy saving applications. The existing arrays on the Campus Center and the North Gym should be maintained so they can continue to serve the campus and benefit the community.

PHOTOVOLTAICS

New building when possible should incorporate photovoltaic arrays on their roofs to harness power from the sun.

Parking lots, when upgraded, should be designed with photovoltaic canopies over parking stalls, where applicable.

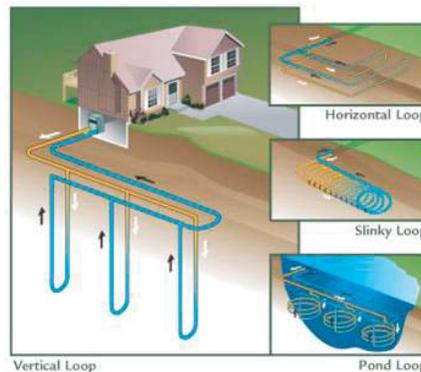

WIND TURBINES

While LAVC is not an optimum location for wind turbines, installation of small parapet mounted units is desirable for demonstration purposes.

HEAT PUMP SYSTEM

All new buildings, when possible, should incorporate a heat pump system to conserve energy in their air conditioning.

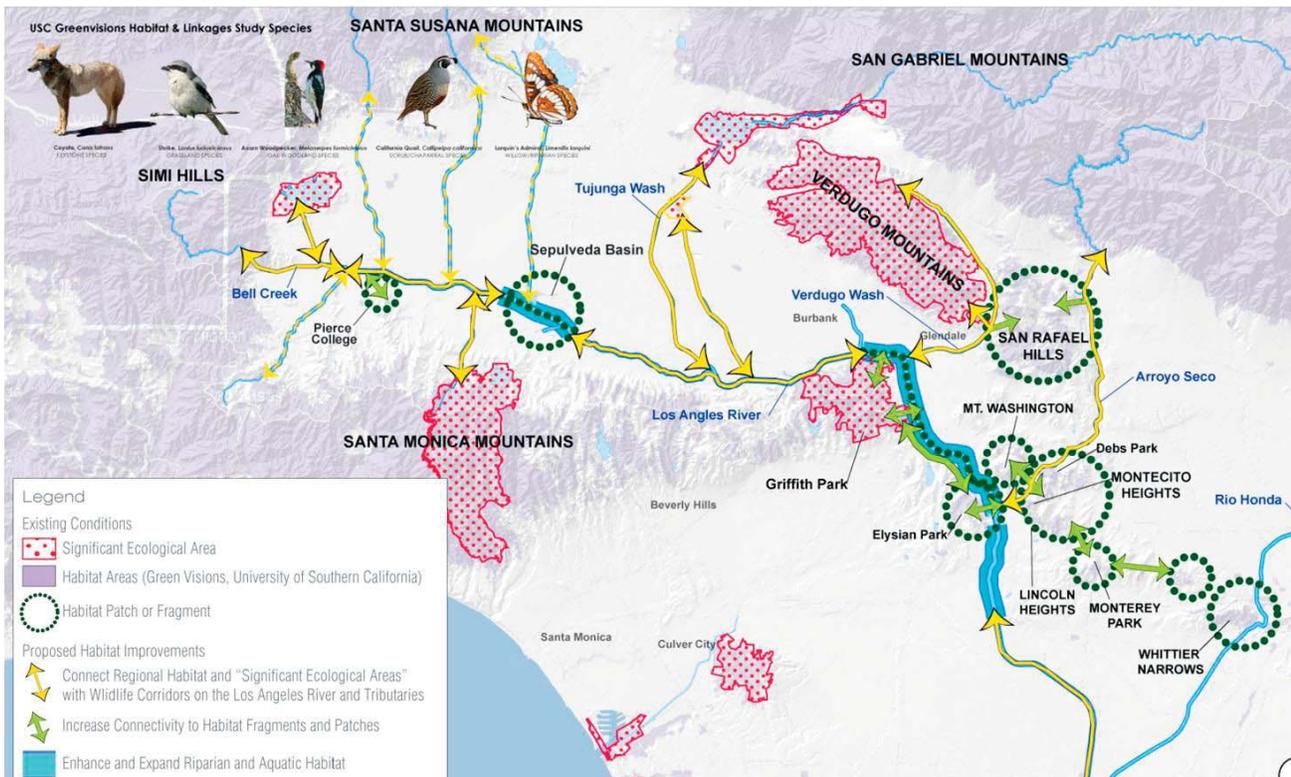

SUSTAINABILITY

RESOURCE RECOVERY CENTER

The college is studying the possibility of a resource recovery center on campus for recycling. Its location has been identified at the northeast corner of the PE/Athletics zone.

BIOME / NATURAL HABITAT

With natural and native landscaping, LAVC hopes to bring some of the native fauna back into the campus.

Meeting Notes	6.28 - 6.57

MEASURE J PROJECT LIST

Project number	Type	Description	Internal Notes	Public Notes
V-11	Jobs	Media Arts Building	The new Media Arts Building will allow the college to provide a state of the art training facility. The two-story structure will house the disciplines of cinema, video, photography, graphic arts, journalism, and commercial music, all using digital tools employed by industry. It will include a 250 seat screening theater, digital production labs, meeting rooms, classrooms, and faculty offices.	A New 2-story, approx. 52,500 SF Media Arts Center including smart class, labs, production, and control rooms.
V-12	Jobs	Los Angeles Valley College Community Work Force Development Center	The plan include co-locating a City of Los Angeles Work Source Center on site - which will function as an independent entity, while leveraging college and community resources. Designed to serve as a collaborative outreach to the community, the facility will provide workforce development, college education and community services to college students, job seekers, business and industry organizations, and the local community.	New building of 45,000 sq. ft. will function as an independent entity while leveraging college and community resources.
V-13	Basic Facilities	Athletic Training Facility	The Facility includes a new Baseball Training Center & Field House Building, stadium lighting renovation along with athletic offices, weight training, expanded locker rooms, video training, equipment storage, and meeting facilities. The Baseball Training Center will be adjacent the Baseball Fields with strength training, restrooms, video training areas, coaching/teaching offices, meeting rooms, and storage.	New Baseball Training Center & Field House Building
V-14	Jobs	Planetarium Building Expansion	This is an extension to the Planetarium by adding a new 40' dome, as well as new classroom teaching spaces, restrooms, and related equipment.	New addition to the existing Planetarium Building
V-15	Jobs	Performance Arts Center	The Center will be a teaching facility, a meeting location for campus events, and an entertainment venue for students and the community. Consisting of a 500-seat main stage theater, a 99-seat horseshoe theater, and a black box experimental theater, this facility will provide performance spaces for theater productions and for teaching purposes. This will include production facilities such as a set construction shop, dressing and make-up rooms, costume shop, storage areas, and ticket booths, as well as classrooms and faculty offices. Will support Theater, Dance and Music programs.	A new 40,000 sq. ft. Performing Arts Center for Dance, Music, and Theater productions. Entertainment venue for students and community.
V-16	Jobs	Multi-Purpose Community Services Center	Will house offices and classrooms for Community Extension and Credit programs. New building including demolition of 20,000 sf of existing facilities.	New 20,000 sq. ft. Center will support community services and extension programs
V-17	Basic Facilities	General (Landscaping, Signs, Walkway, Parking Lots)	Based on the Architect's estimate for renovation of parking lot, roadway and walkway on campus plus parking west of softball field, and campus irrigation.	For renovation of parking lot, roadways, walkways, signage, and campus irrigation.
V-18	Basic Facilities	Parking Structure	New parking structure with 600 stalls. Location will be one of the existing parking lots in the campus. Improvements to road surfaces, sidewalks and walkways, parking lot surfaces, landscape improvement, and water and energy conservation projects.	New parking structure with 600 stalls. Location will be one of the existing parking lot in the campus.
V-19	Jobs	Student Support Services (Cafeteria/Bookstore Renovations and New Food Services Venues)	Refurbishment of the student services area and current cafeteria services building to include upgrades to the infrastructure of the building (piping and electrical), create update food service venues with seating conducive to student gathering and study opportunities.	Renovation of existing Cafeteria and develop new food service venues.
V-20	Jobs	Business Technology Building	This center will integrate business, commerce, and technology related areas. It will provide state-of-the-art facilities including technology capabilities, computer labs and technology equipped classrooms with cutting-edge presentation equipment from video to networked computers. Interactive video allows two-way video and audio connections for remote locations. In addition to academic courses, community events, workshops and seminars will be offered here.	New 25,000 sq. ft. Center will integrate business, commerce, and technology related programs.
V-21	Jobs	New Environment Center	Will house environmental technologies program to include water reclamation and waste energy courses. This will help create new economic opportunities in the area, build environmental science support programs. The building will house laboratories and classrooms as well as practical learning spaces and will include new technology and design for green science focused applications.	A new Environmental Science Building of 15,200 SF.
V-22	Jobs	Campus Modernization	To modernize / improve indoor / outdoor facilities and infrastructure throughout the campus.	To modernize / improve outdoor facilities and infrastructure
V-90	Satellite	Valley Satellite	A satellite in this area would provide general, workforce and ESL services to LACCD students in Burbank area.	

*Revised May 7, 2008

2006 MASTER PLAN

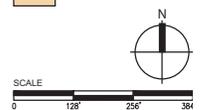

MTA

2006 Long Term Facilities Master Plan

The recommended Master Plan organizes the campus with a new layer of site refinements to allow the college to be able to respond to future growth and change and to create a landscape that strengthens the park-like oasis. The sites for the museum and fire tower have not been finalized and will be located on the Master Plan when selections are made.

PARKING ANALYSIS

MEMORANDUM

Date: August 21, 2009
To: Elena Andrews, Steinberg Architects
From: Netai Basu & Laura Wolfram
Subject: Future Parking Demand Estimate for Los Angeles Valley College

SM09-2357

INTRODUCTION

The purpose of this memorandum is to document analysis conducted by Fehr & Peers to estimate the future parking demand at Los Angeles Valley College (LAVC). This analysis was undertaken to assist in the current planning process that will result in a revised Campus Facilities Master Plan. A 2002 study of parking utilization at LAVC that developed empirical parking demand factors specific to the campus was reviewed¹ and new parking utilization surveys were conducted in the Spring 2009 semester. This data, together with previous and current data on student enrollment, was used to estimate future parking demand at the campus.

PREVIOUS PARKING DEMAND ESTIMATES

The traffic and parking study conducted for the environmental impact report for the previous campus Facilities Master Plan update was completed in April 2003. That study included a comprehensive parking utilization survey of on-campus parking lots and adjacent streets between 8:00 AM and 9:00 PM on Wednesday, October 2, 2002. The survey was conducted during the fifth week of classes for the Fall 2002 semester, after campus activity levels had stabilized. Peak parking utilization was found to occur between 10:00 and 11:00 AM, with a secondary peak occurring between 7:00 and 8:00 PM during evening classes.

At that time, planning for the campus was based on projected full-time equivalent students (FTES) in the then-future academic year (AY) 2008-2009. Student enrollment data was also provided for AY 2002-2003 and parking demand factors of 0.267 spaces per AY FTES for the weekday daytime peak and 0.224 spaces per AY FTES for the weekday evening peak were developed. These parking demand factors are based on the peak number of occupied parking spaces, the number of AY FTES and a 10% circulation allowance.

For use in this study, LAVC has provided additional data on past and current FTES, including the details of enrollment during each term or semester. Table 1 summarizes LAVC enrollment history by term from AY 2002-2003 to AY 2008-2009, and includes the current projected FTES enrollment for Fall 2023, the planning horizon for the current Facilities Master Plan revision.

Page 2

Because the current student enrollment projection is for a single term (Fall 2023), rather than for an entire academic year (AY 2023-2024), it is necessary to convert the previous parking demand factors from spaces per AY FTES to spaces per semester FTES. This results in parking demand factors of 0.583 and 0.488 parking spaces per semester FTES for the Fall 2002 weekday daytime peak and weekday evening peak, respectively. This data is summarized in Table 2.

SPRING 2009 PARKING UTILIZATION SURVEY

For this study, new parking utilization surveys were conducted between 8:00 AM and 9:00 PM on Wednesday, May 20, 2009. Information from LAVC staff showed that activity levels were nearly identical on Tuesdays and Wednesdays in the Spring 2009 semester but that the number of students taking Wednesday classes was slightly (1%) higher. The detailed hourly occupancy data for on-campus parking and off-campus street parking is provided in the attachment to this memorandum, as well as a figure showing the location of surveyed parking facilities.

A graph of the hourly parking utilization for each survey is presented in Figure 1. The pattern of parking utilization is consistent with the 2002 parking survey, the daytime peak occurring between 10:00 and 11:00 AM, and a secondary peak occurring between 7:00 and 8:00 PM. The actual number of parking spaces utilized, however, was observed to be approximately three-quarters of what was observed in 2002.

Several factors combine to explain this decline in parking utilization:

- The number of enrolled students in Spring 2009 was slightly lower than in Fall 2002 (5,939, compared to 6,136, a reduction of about 3%).
- Due to time constraints, the parking count for spring 2009 was not completed until the 15th week of the semester. The Fall 2002 parking survey, as noted, was conducted in the fifth week of the semester. Enrollment data from LAVC staff shows that on this date enrollment had dropped to 93% of the spring semester census.
- No data was available on actual class attendance (absenteeism) but because the Spring 2009 survey was conducted late in the semester, it is believed that this factor contributed to the reduced parking demand per student observed, relative to the Fall 2002 survey.
- An increase in distance learning (classes taken entirely on-line) occurred. In Fall 2002, the number of students taking classes this way was negligible, but in Spring 2009 this had increased to approximately 4% of all classes.
- The Metro Orange Line, a dedicated bus transitway with a station immediately adjacent to the LAVC campus, opened in late 2003. While no data was available on the actual transit mode share for college-related trips in either survey year, this improvement in public transit service may have resulted in a greater portion of students and staff traveling to and from campus by public transit rather than by private vehicle.

In analyzing the Spring 2009 utilization data, several factors that influence parking requirements were controlled in order create consistent estimates of students on campus. Because the Fall semester typically has higher student enrollment than the Spring semester, semester FTES were used (rather than AY FTES) to eliminate differences in enrollment by semester. Enrollment data at the time of the survey (in the 15th week of the semester, rather than shortly after the semester

PARKING ANALYSIS

Ms. Elena Andrews
August 21, 2009
Page 3

census) was used to determine the number of semester FTES at the time of the survey. The increase in distance learning was accounted for by adjusting the semester and annual FTES to reflect the number FTES with on-campus classes. These adjustments reduced the total Spring FTES from 5,939 to an estimated 5,312 on May 20, the day of the parking utilization survey.

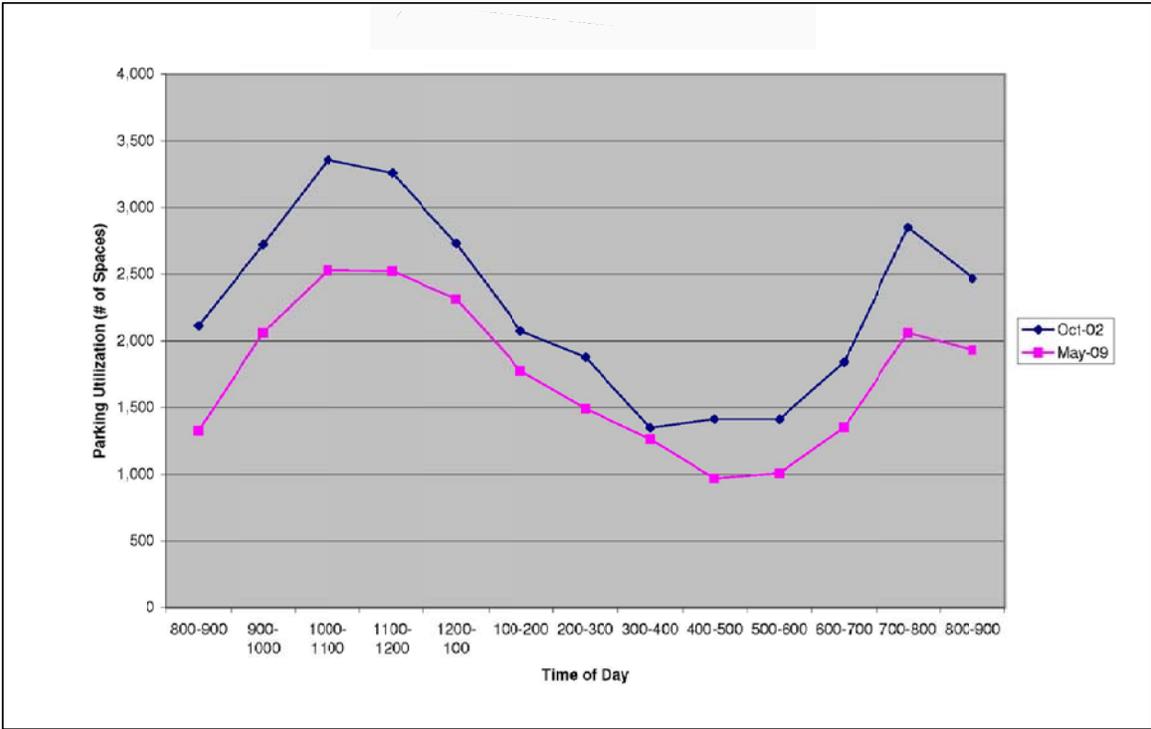

The same method was employed to calculate the weekday daytime and evening peak parking requirements, using the parking utilization survey results for Wednesday, May 20, 2009. Semester and annual parking requirements were tabulated using the adjusted Spring 2009 FTES and the 2008-2009 AY FTES. The requirements based on AY FTES are 0.210 spaces per AY FTES for the weekday daytime peak and 0.171 spaces per AY FTES for the weekday evening peak. The requirements based on semester FTES are 0.524 spaces per FTES for the weekday daytime peak and 0.427 spaces per FTES for the weekday evening peak. The same proportional relationships were found between the parking requirements and the FTES.

FUTURE PROJECTED PARKING REQUIREMENTS

The calculated peak parking requirement factors per semester FTES for 2002 and 2009 differ by approximately 10%. As discussed, two factors that could not be specifically determined but are believed to have resulted in the reduced parking demand per semester FTES are increased absenteeism late in the semester and increased use of public transit by students and staff.

In order to fully provide for the anticipated parking needs at LAVC, it is recommended that the higher parking requirement factor be used for the purpose of facilities planning with one adjustment. Distance learning was negligible in 2002 but in 2009 had risen to 4% of all classes. Because this phenomenon is expected to continue at this level or higher, it will reduce the amount of parking needed on the campus proportionately. Thus, the recommended parking requirement factors to be used in providing for the future parking needs of the campus are 0.560 spaces per semester FTES for the weekday daytime peak and 0.468 spaces per semester FTES for the weekday evening peak, as shown in Table 2. Application of the higher factor to the projected 7,240 FTES in Fall 2023 results in an estimated future parking requirement for the campus of 4,054 spaces.

PARKING ANALYSIS

MEMORANDUM

Date: October 14, 2009

To: Mark Docdocil, Steinberg Architects
Elena Andrews, Steinberg Architects

From: Netai Basu & Laura Wolfgram

Subject: *Estimated Trips to/from Proposed Parking Structure at L.A. Valley College*
SM09-2357

In the assessment of future parking needs for the campus that we completed in August, we determined that the parking demand factors developed in the previous master plan studies are still appropriate for use, with a minor reduction to account for the distance learning phenomenon.

With that background, we reviewed the current student enrollment projections and applied the trip generation rates developed in the previous master plan studies to prepare estimates of total future trips to/from campus in the 2023 horizon year. As shown in the attached Table A, total future trip generation is estimated at this time to be approximately 39,000 daily trips, including approximately 3,678 trips in the AM peak hour (2,747 inbound, 931 outbound) and approximately 2,310 trips in the PM peak hour (1,187 inbound, 1,123 outbound). This represents a 20% increase over the estimated existing (Fall 2008) traffic volumes at the college and is directly related to the projected increase in student enrollment.

The proposed master plan will modify the location of parking facilities on the campus as well as alter the existing travel patterns by closing Ethel Avenue south of Hatteras Street except during special events. Currently approximately 40% of the on-campus parking supply is located north of Hatteras Street. With the changes proposed, this will increase to approximately 65%. The proposed 1,200-space parking structure will supply about 30% of the total on-campus parking supply. Because the allocation of the future parking supply has not yet been determined (students, staff only, etc.), it is reasonable to assume that approximately 30% of the site-generated trips will begin or end at the proposed parking structure. Thus, trips to/from the proposed parking structure could be approximately 11,800 daily trips, including approximately 1,100 trips in the AM peak hour (825 inbound, 280 outbound) and approximately 690 trips in the PM peak hour (355 inbound, 335 outbound).

Based on student zip code information used in previous master plan studies, about 75% of the trips come from the north, west, or east. The remaining 25% of the trips come from the south. The projected increase in site-generated traffic (due to increased enrollment) and changes in the location of parking on the campus and the effective closure of Ethel Avenue as a through route from the south, the amount of traffic on Ethel Avenue between Hatteras Street and Oxnard Boulevard could increase by 50% or more above current levels.

This discussion is based on the data available at this time. As part of the studies that will be done as part of the EIR for the proposed changes to the campus master plan, analysis will be done to quantify the existing baseline traffic conditions on and near the campus, as well as to develop detailed projections of future conditions. Contact me with any questions or comments about this.

	Year [e] 16,455	39,139	2,747	931	3,678	1,187	1,123	2,310
	Semester 7,240							
Net Increase								
	Year 2,656	6,644	466	158	624	201	191	392
	Semester 1,229							

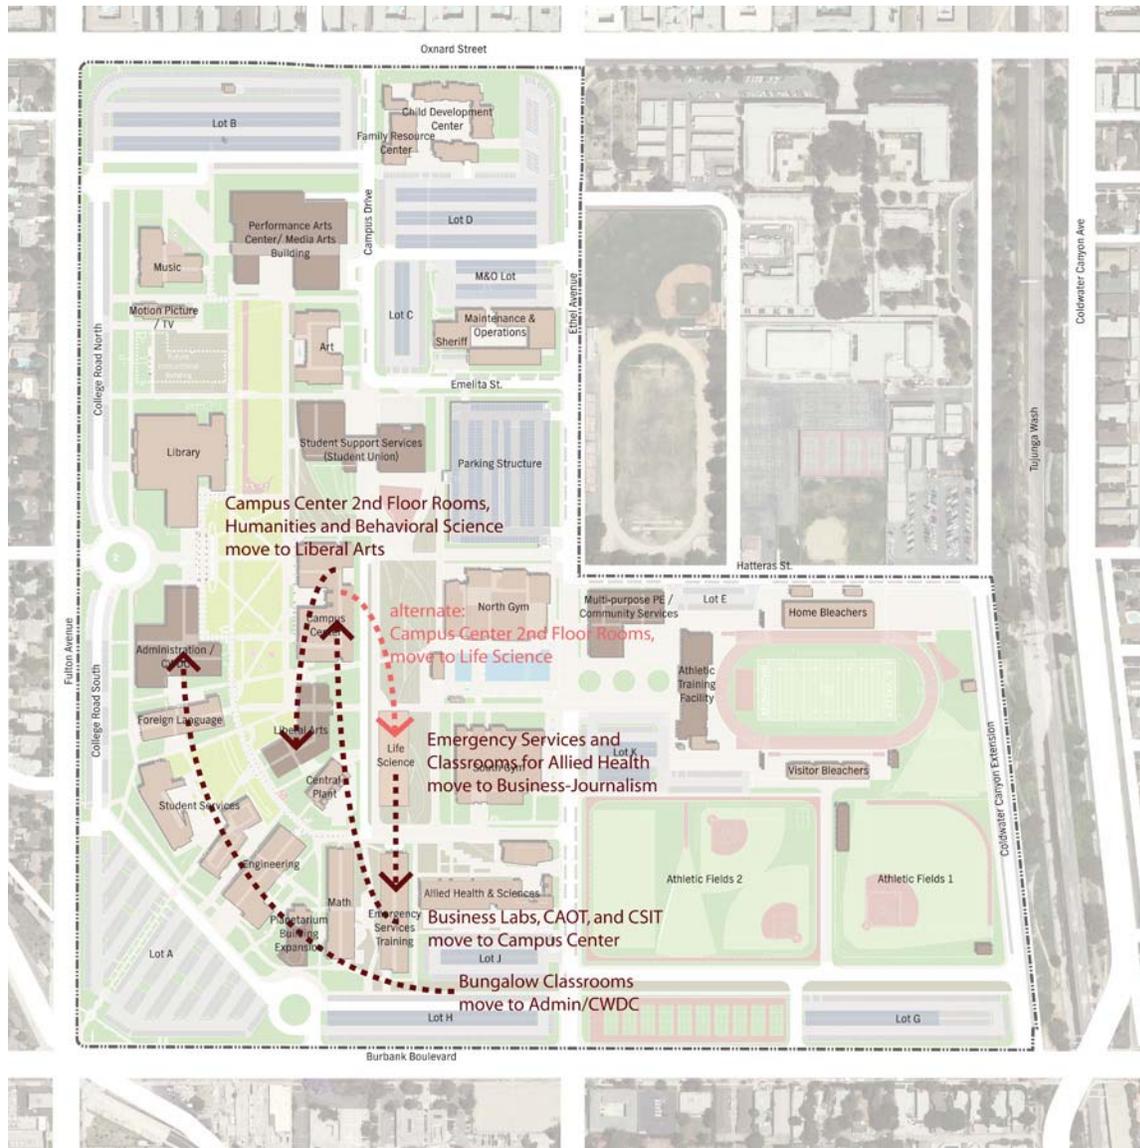

Notes:

- a. Source: Valley College, July 2009.
- b. Estimated total existing trips was calculated using the trip generation rates found in the *Traffic and Parking Study for the Los Angeles Valley College Facilities Master Plan Environmental Impact Report* (Kaku Associates, Inc., April 2003).
- c. Empirical trip generation rates estimated from manual in/out count data conducted at Valley College campus access points in fall 2002. Rate = Existing Trips / Existing FTE Students.
- d. Trip Generation Rates converted from annual FTES to semester FTES based on Fall 2002 and AY 2002-2003 enrollment data.
- e. Estimated annual FTES enrollment calculated by dividing the predicted fall FTES enrollment for 2023 by the average fall FTES to annual FTES enrollment rate from 2002-2008.

MEETING NOTES

MEETING SUBJECT

LAVC Master Plan

NOTES TAKEN BY

Steinberg Architects

DATE | TIME

04.23.09 | 1:30 PM – 3:30 PM

LOCATION

CC 202

Los Angeles Valley College

ATTENDEES

(see attached sign-in sheet)

OBJECTIVE

1. Goals and Vision

ITEM ID NOTES

1

Schedule

(see attachment 1: Draft Workshop Schedule and Agendas)

2

LAVC Vision / Mission Statement

The following items from the LAVC Mission Statement were identified as key points in the development of the campus master plan:

- Attractive and accessible learning environment
- Quality of life (both on campus and beyond)
- Co-curricular activities that serve to create a rich campus life experience
- Economic development
- Cultural and athletic events
- Park-like quality, with a rich variety of trees
- Laboratory for learning... environment and issues of sustainability

3

Measure J Projects

The Media Arts Building and the Athletic Training Facility, having already been contracted and in the process of design, are pulled out of the list for priority voting.

The following are the projects that received votes, in order of priority.

- Student Support Services (Student Union) – 10 votes
- General Improvements (ADA / Landscaping) – 8 votes
- Multi-Purpose Comm. Services Center (Field House/Gymnastic Ctr) – 7 votes
- Valley Satellite – 6 votes
- Campus Modernization – 6 votes
- Community Workforce Development Building – 3 votes
- Performance Arts Center – 3 votes
- Planetarium Building Expansion – 2 votes
- Business Technology Building – 2 votes
- Parking Structure – 1 vote
- New Environment Center – no vote

415.683.2000 San Francisco
408.295.5446 San Jose
213.629.0500 Los Angeles

AGENDA ITEMS

Workshop 1 – Goals and Vision

Thursday, April 23, 2009 @ 2:30 pm – 3:30 pm | Campus Center Room 202

Agenda

- Confirm Meeting Dates
 - Workshops
 - College Presentations
 - Students
- Visioning Exercise
- Project Update and Priorities
 - Existing/Planned Prop A/AA
 - Measure J
 - Other

Workshop 2 – Campus-wide Space Utilization

Thursday, May 7, 2009 @ 2:30 pm – 4:30 pm | PCR

Draft Agenda

- Review of Goals and Vision
- Existing Department Locations
- Lecture/Lab Utilization
- Campus-wide Space Needs
- Future Buildings

Workshop 3 – Conceptual Plan

Thursday, May 21, 2009 @ 2:30 pm – 4:30 pm | PCR

Draft Agenda

- Campus-wide Space Utilization Update
- Site Analysis
- Land Use Alternates
- Building/Open Space Alternates
- Traffic and Parking Assessment
- Sustainability

415.683.2000 San Francisco
408.295.5446 San Jose
213.629.0500 Los Angeles

MEETING NOTES

WORKSHOP 1

Workshop 4 – Master Plan Development

Thursday, June 18, 2009 @ 2:30 pm – 4:30 pm | PCR

Draft Agenda

- Conceptual Plan Update
- Land Use Plan
- Building Locations and Massing
- Landscape Plan

Workshop 5 – Master Plan and Guidelines

Thursday, July 16, 2009 @ 1:30 pm – 3:30 pm | PCR

Draft Agenda

- Master Plan Update
- Guidelines
 - Architectural
 - Landscape
 - District Sustainability
 - Other

Interim Meetings

- Campus Standards (April/May)
- Utilities Master Plan
- Implementation Plan

July and August 2009

Workshop 6 – Final Review

Draft Agenda

- Recommended Master Plan
- Guidelines
- Utilities Master Plan
- Implementation Plan

Thursday, September 10, 2009

ATTENDEES

(See attached sign-in sheet)

OBJECTIVE

1. Discuss Campus-Wide Space Utilization

ITEM ID NOTES

1 **Draft Master Plan Goals**
 (See Attached Revised Draft)

2 **Needs, Wants and Issues**

- Current computer labs on campus
 - 15 stations : Lion’s Den (Cafeteria)
 - 13 stations : Library
 - 15 stations : Library restricted to database use
 - 45 stations : Lair(adjacent to library)
 - 40 stations : CCAT lab – only one with color printer
 - 25 stations : Writing Center
- Confirm how many will be added in New Library
- Status quo of non-class computer labs seems to work okay.
- Campus plans to upgrade wireless connection throughout campus, with hot spots in key locations.
- The shade structures in the Art and Monarch patios need to be revisited – they don’t provide enough shade.
- Incorporate Art in Public Areas – 0.5 % (approx. \$1.5 M) of Measure J budget dedicated to Public Art.
- Add drop-off points on north and south side of campus.
- Landscaping should be refurbished with young trees.
- Re-purposing old building is not desired. Preference for new buildings
- New Environment Center could be a part of Technology Building, and potentially the planetarium.
- Planetarium could use a classroom, instead of an observatory expansion.
- A parking structure would be a necessary part of the campus development.

NEEDS

415.683.2000 San Francisco
 408.295.5446 San Jose
 213.629.0500 Los Angeles

MEETING NOTES

WORKSHOP 2

<ul style="list-style-type: none"> • New ceilings and floors in renovated buildings • Remove graffiti on bathroom doors – Image issues • Parking lot lighting and new surfaces • Right-hand turn radius at Fulton Entry is too tight • Remove Bungalows • Landscape maintenance – added to issues • Site accessibility • Landscape around new Athletic Complex • Address noise at Monarch Square
<p>WANTS</p> <ul style="list-style-type: none"> • 250-station computer lab • 100-station computer lab – too many stations in one space • Bookstore with natural light and ventilation • Alumni recognition • Community Workforce Development building on south side of campus with priority registration of classrooms • New Administration Building with classrooms on second story • Designated smoking areas • Consolidate Computer Sciences • Revisit Marquis and Gazebo designs • CSIT Bungalow only have used – could be used for swing space
<p>ISSUES</p> <ul style="list-style-type: none"> • Provide more student gathering spaces • Improve the quality of life on campus • Provide flexibility in buildings to meet changing needs • Improve campus edges • Improve wayfinding • Provide a brand/identity for LAVC • Campus feels cluttered and congested • Humanities Building blocks the flow of space • LAVC must be “Everything to Everyone” • Provide non-traditional learning experience • Landscape maintenance

- 4 **Lecture / Lab Utilization**
- Campus is generally not busy in the afternoons. A diagram showing classroom utilization separating morning, afternoon, and evening would be useful.
 - Life Science building will have 2 XXL classrooms (capacity > 70)
 - Verify that all classrooms are accounted for, particularly in Engineering and Business.
 - Add PE to space utilization diagram

- 5 **Next Meeting**
 Workshop 3 – Conceptual Plan
 – Thursday May 21, 2009

DISTRIBUTION

- ALL ATTENDEES (SEE ATTACHED SIGN-IN SHEET)
- OTHER:

OBJECTIVE

Discuss Conceptual Site Plan

ITEM ID NOTES

- 1 **Conceptual Schemes**
 - Combine “J” Circulation & Greenbelt
 - Central Park & Small Plazas Associated with Buildings
 - Consolidate Athletic Fields

- 2 **Desires and Opportunities**
 - Bio-swale and Storm water Collection
 - Commemorative Brick Paving – for fundraising
 - Student Gathering Spaces
 - 9 (?) English Oak tree seedlings
 - Trees in Parking Lots

- 3 **Assets and Sensitive Areas on Campus**
 - Old Quad Park, Memorial Bench
 - Planetarium, Memorial Plaque on ground outside
 - Fig Tree in South corner of Lot A, by Burbank Blvd.
 - Tree North of Planetarium – significant to President Clinton’s visit
 - Horseshoe Seating Area
 - Time Capsule near Fulton Entry
 - Theater Arts Plaza (west of Theater Arts Building)
 - Music Patio, Art Patio with Fountain
 - Trees Around South Gym

- 4 **PE / Athletic Facilities**
 - Stadium, Track & Field
 - Baseball Field
 - 2 Softball Field
 - Football Practice Field with 4-lane Jogging Track around
 - Tennis Courts
 - Archery
 - Javelin

- 5 **Next Meeting**
Workshop 4 – Master Plan Development

OBJECTIVE

Discuss Master Plan Development

ITEM ID NOTES

- 1 **Master Plan Drivers**
 - Educational Master Plan: Priority projects include Media Arts Building, Community Development Services Building, Student Services Support (Cafeteria, Bookstore), Campus-wide Improvements, and Projected Growth.
 - Parking: The need for a parking structure of at least 800 spaces was identified.
 - Need to check if FTEF numbers include staff
 - The possibility of putting parking under athletic fields was suggested, a costly, urban approach.
 - Concern about parking separating Athletics from Academics was raised.
 - Lot B needs to be re-organized
 - Relocating the existing communications tower in lot B to top of a new building should be investigated.
 - Environmental Impact Report: Mitigation factors were presented
 - Maintain Quadrangle (Monarch Square, Mall)
 - Maintain “J” framework
 - Preserve Landscape
 - Sensibility to Building Heights, Scale, and Materiality
 - Master Plan Goals: Previously identified goals were reviewed

- 2 **Interim Studies**
 - Athletic Fields: The proposed consolidation/reorganization of athletic fields was presented
 - Home side stadium access need emphasis
 - Existing maintenance storage shed among the athletic fields should be replaced
 - Performance Arts and Media Arts: Pros and Cons of different options for siting of new building in the Arts District were presented, and where Media Arts and Performance Arts together form a complex that caps the mall was identified as the preferred scenario.
 - Landscape

408.295.5446 San Jose
213.629.0500 Los Angeles

MEETING NOTES

WORKSHOP 4

- 3 **Sustainable Water Strategies:** The college showed great interest in exploring different sustainable strategies, particularly in water conservation.
- Existing Stormwater System
 - 14" of rain annually over 105 acres of campus
 - 70% of that runs off site
 - 28 million gallons or 85 acre foot of water drains off site annually, 80% during winter months
 - Lawn Irrigation Water Use
 - 18 acres of campus lawn consume 27 million gallons or 82 acre foot of water annually = 1 olympic-sized pool of water per week.
 - Centralized Rainwater Cisterns
 - Capturing enough rainwater to irrigate 50% of lawn during the dry-season would require a 15' deep basin, 332'x332' to hold 12 million gallons or 37 acre foot
 - Distributed Rainwater Cisterns
 - Capturing rainwater with rooftops and building cisterns could supply ~15% of irrigation needs for lawns (each with a 160,000 gal cistern).
 - Smaller cisterns could supply water for toilets.
 - Campus Greywater: most viable
 - Buildings with showers, such as Gyms, have the greatest potential for graywater re-use. Graywater can be treated in a biological system before being re-used.
 - Aquifer Recharge Strategy
 - Capture, treat, and infiltrate ALL storm water on-site.
 - Recharge the aquifer, improve water quality, and improve urban forest health.
 - Porous paving could be a disadvantage with maintenance
 - Purple Pipe: this system of recycled water could be coming to the campus in the next few years
- 4 **Conceptual Framework Update**
- Measure J Committed Projects: Projects currently underway include Athletic Training Facility, Media Arts Building, Performance Arts Center, and Planetarium Expansion
 - Identified College Needs
 - New Student Union (Cafeteria, Bookstore, ASO, Student Health, etc) should be one building
 - New 2-story Administration Building: CWDB incorporated
 - Landscape Improvements: including parking and walkways (ADA accessibility)
 - Maintaining Planetarium's functionality
 - Parking Structure
 - Multi-purpose PE/Community Services Building
 - Master Plan Horizon 1: Proposed Master Plan of Measure J Projects presented.
 - Humanities Building, particularly the ramp, needs to be looked at.
 - Life Science Building preferably torn down because of maintenance issues
 - Overbuilding in the eyes of the state is an issue
 - Outdoor stage desired
 - Wildlife support encouraged
 - Covered pathways desired
 - Central park idea missed
 - Master Plan Horizon 2: Potential post-Measure J campus build-out
 - Planetarium relocation an issue.
- 5 **Next Meeting**

MEETING NOTES

MEETING SUBJECT

LAVC Master Plan – Workshop 5

NOTES TAKEN BY

Steinberg Architects

DATE | TIME

07.16.09 | 1:30 PM – 3:30 PM

LOCATION

PCR

Los Angeles Valley College

ATTENDEES

Los Angeles Valley College: Larry Nakamura, Lynn Polasek, Yasmin Delahoussey, Carole Yee, Tom Lopez, Sue Carleo, Christian Nova, Sandy Mayo, Dana Lubow, Joanne Waddell, Diedra Stark, Tom Jacobsmeyer, Gary Honjo, Jennifer Fong, Deborah diCesare, Israel Ortiz

Build LACCD: Julie Fuller

Pacifica: Erick Larsen

URS: David Abernathy, Rob Illingworth

Steinberg Architects: Elena Andrews, Mark Docdocil

SWA Group: Gerdo Aquino, Alex Robinson

OBJECTIVE

Discuss Master Plan Development

ITEM ID NOTES

- 1 **Utilization**
 - Existing Library program should be counted in the current utilization study.
 - Programs that will move into new Library
 - Media Services (Bob Dodds) – currently in Temp Library
 - Writing Center – currently in Math Bldg
 - Math Lab (Sheri Berger) - currently in Math Bldg
 - Breakdown analysis of lec/lab utilization by department
 - Science Department could offer green technology classes to maintain some systems.

- 2 **Athletic Fields**
 - Potential to use artificial turf in all athletic fields should be studied.
 - A new jogging path should be proposed to replace existing track around practice field.
 - Hill removal should be done as part of Baseball field project. Follow up with Cannon's scope of work.
 - Other options should be studied and compared with cost of hill removal.

415.683.2000 San Francisco
408.295.5446 San Jose
213.629.0500 Los Angeles

MEETING NOTES

WORKSHOP 5

- 3 **Program:**
- Add one instructional room each in Athletic Training Facility, Multi Purpose Community Services Center, and Planetarium Expansion.
 - Health Center currently in North Gym will move temporarily to Financial Aid Bungalow once Student Services is completed. Vacated space in North Gym will be reclaimed for equipment storage.
 - Outdoor events should be considered in the location of future classrooms for noise issues.
 - Verify space needed by IT in Campus Center.
 - Compliance Office will move to Admin.
 - Campus Center 1st floor will need some kind of office presence to serve conferences in Monarch Hall.
 - Faculty Lounge will be in Student Union but separate from student areas.
 - Transfer Lounge – Club Rooms, Honors, VCAP in Student Union
 - Community Services has a staff of about 78. Needs a fenced area for drop-off and pick-up. Needs at least 3 classrooms for arts and crafts, etc. Could potentially use Athletic training facility's large meeting room.
 - Free Speech area will be designated by the college.

- 4 **Implementation**
- Life Science is the only building not connected to Central Plan and is a two pipe system. Good candidate for demolition.
 - Business-Journalism's proximity to AHS is good for science lecture classes.
 - Could Theater Arts building be saved?
 - Campus Drive North could potentially be eliminated and the trees could be moved elsewhere.
 - Fire / Service Access need to be studied.

- 5 **Next Meeting**
Workshop 6 – Implementation
– Tuesday, August 25, 2009

DISTRIBUTION

MEETING SUBJECT

LAVC Master Plan – Workshop 6

NOTES TAKEN BY

Steinberg Architects

DATE | TIME

08.25.09 | 10:00 PM – 12:00 PM

LOCATION

PCR
Los Angeles Valley College

ATTENDEES

Los Angeles Valley College: Tom Jacobsmeyer, Yefrem Kozin, Deborah diCesare, Sue Carleo, Lynn Polasek, Jacquelyn Hams, Elizabeth Ortiz, Tom Lopez, Dana Lubow, Sandy Mayo, Joanne Waddell, Diedra Stark, Marla O'Connell, Don Gauthier, Israel Ortiz, Richard Holdredge, Dennis Reed, Larry Nakamura, Yasmin Delahoussaye, Jennifer Fong
Pacifica: Erick Larsen
URS: David Abernathy, Jim Rogers
Steinberg Architects: Elena Andrews, Mark Docdocil

OBJECTIVE

Discuss Implementation and Prioritization

ITEM ID NOTES

1

Site Plan

- To dissuade students from speeding through the campus, the east side of driveway for the road just south of CDC should be closed off. The access road will be moved down so that it would have to zigzag back to the access road in lot B. speed bumps could be added.
- There is some concern about aesthetics for Art building facing the service road to the east. The designation of this road as service road will not change the way it currently looks.
- Catering trucks should be able to access Monarch Hall and Student Union plaza for events.
- Test how many students can fit in the student union plaza.
- Water features could pose maintenance problems. But wetland simulation in the sustainable park is desirable. This could potentially be moved down south away from student activity in the student union plaza.
- Sustainable strategies could be consolidated into one project, at a smaller scale.
- A drop off area for student union building should be studied.
- Drop off area for Performance Arts building needs to be moved over to the left.
- The planetarium is concerned of light impact from the drop off zone close to it.
- Designate short term parking in the parking structure for drop off and pick up.
- Fire lane around pool may be redirected.
- Food kiosk would bring activity to the park, but could be a problem with littering.
- Area south east of South Gym could be a location for barbecue area.
- Southbound Ethel will be closed to traffic, but could be opened for events.
- Coldwater Ext. / Burbank driveway should be re-worked.

2

Move Plan / Implementation

- Business Office and Student Senate will be moving to Admin., not Student Services.
- IMS will be going into the new library.
- Allied Health classes are using the general ed. classrooms in Emergency Services Training (Life Science).
- Public Information Office needs location – in Administration.
- Power in bungalows would need to be upgraded if these are to be used for office swing space.
- Alternatively, a temporary village could be set up either in the old shop bungalows area or in the old CDC site.
- Resource Recovery Center is funded separately, not part of measure J.
- Short term landscape improvements needed.

MEETING NOTES

MEETING SUBJECT
LAVC Master Plan

NOTES TAKEN BY
Steinberg Architects

DATE | TIME
09.10.09 | 1:30 PM – 3:30 PM

LOCATION
Cafeteria Conference Room
Los Angeles Valley College

ATTENDEES
Los Angeles Valley College: Deborah diCesare, Charmagne Shearrill, Carole Yee, Tom Jacobsmeyer, Israel Ortiz, Larry Nakamura, Diedra Stark, Joanne Waddell, Tom Lopez, Sandy Mayo, Bre Sulsw (sp?), David Falk, Lynn Polasek, Sue Carleo, Lynn Brower, Jennifer Fong
Pacifica: Erick Larsen
URS: David Abernathy
Steinberg Architects: Elena Andrews, Mark Docdocil
SWA Group: Gerdo Aquino, Alex Robinson

OBJECTIVE
Discuss Master Plan Development

ITEM ID NOTES

- 1 **Master Plan Goals / Measure J Projects**
 - The EMP Goals, previously identified campus Needs, Wants, and Issues, and Master Plan Goals were reviewed
 - Original Measure J Projects list was compared with Master Plan Projects list
 - It was noted that the terminology for the projects should be consistent
 - Community Workforce Development Center should have its own identity distinct from Administration
 - Business Technology Building was supposed to take in CSIT and the computer lab(s) that's located in Business Journalism
 - It was stressed that the Master Plan projects should co-relate to the Measure J projects and their original definition

- 2 **Master Plan Update**
 - The presentation of potential public art locations was questioned, as a public art committee is being formed and should be involved in that decision process
 - The master plan might simply state that public art should be placed on campus
 - Or if it does identify potential locations, even if simply placeholders, Monarch Square and Allied Health Plaza should be identified
 - The question of whether it's preferable to have public art internal to the campus, or external and visible from the street was raised, and the response was that an internally located piece would incite better interaction from people as opposed to ones visible primarily from a speeding car
 - The planetarium would like a buffer area between the building and the drop-off zone for noise, and make sure no large trees are planned around the building
 - The new drop off should be studied more closely to make sure that the issues that the existing new one at Fulton are not repeated
 - Restricted access devices (lever arm gates and retractable bollards) need to be revisited
 - The potential for using the old CDC trailers for temporary relocation should be explored
 - Pacifica expressed that Lot D is planned to be the kick off location for photovoltaic array in the parking lot

415.683.2000 San Francisco
408.295.5446 San Jose
213.629.0500 Los Angeles

MEETING NOTES

WORKSHOP 7

- 3 **Landscape Plan Update**
- Free Speech Area should not be identified in the master plan. The college will identify this location
 - The Student Union Plaza should be designed to be functional for events such as Club Day, etc.
 - Arroyo feature does not necessarily have to continue underground under Business Building.

- 5 **Next Steps**
Departmental Council Presentation –October 6, 2009

Yet to be scheduled: (coordinate with Maggie Lopez; Jennifer Fong can disseminate the information)

College Council Meeting

FMP Meeting

Town Hall Meeting

The master plan shall remain a draft until approved by the Board of Trustees

It is a goal to be able to present to the Board when they meet at LAVC on November 18

WORKSHOP 7

MEETING NOTES

Project Name Los Angeles Valley College Master Plan
Meeting Location LAVCC Cafeteria Conference Room
Subject General Review
Present

Notes

Review of Current Landscape Plan with College:

Green Curriculum / Maintenance Help for sustainable features possible. Investigate "green" curriculum and ways in which they could combine with sustainable park design. Also, recycled water systems jobs could be a powerful approach. (LYNN)

Public Art Locations: Should we specify places? Tabled.

Access Issue: Can we stop student access to interior by having flush paving surface, like USC? We can avoid red curbs and other items that clutter area.

Free Speech Area: Cafeteria is legal place. College will consider where it should go. Legal counsel required.

North Mall: Riparian feature, how does it work, flow, with existing drainage conditions (Tom Lopez).
Maintenance conditions of stepped grass -- How? Fit a large mower?

Water Treatment Area:

Where is it located? Interest in placing it in the plan. Would like to place it so that it maximizes habitat potential.

How close to student union -- convenience of utilities and utility to sustainable park? Perhaps there could be a water feature collection device at bottom of the system. Reservoir?

Can the system be extended just west of Allied Health?

Student Union Plaza:

Issue of noise conflict with 2nd story of Campus Center classrooms. Encourage some barriers?

Access to green roof is an interpretative opportunity.

WORKSHOP 7

MEETING NOTES (continued)

Sustainable Benchmarks:

What percentage lawn reduction?
Other benchmarks / calculations...

Athletics Plaza

Identify arch or other feature to highlight Home side of the stadium.

South Drop Off

Trees around observatory could be a problem. Maybe astronomy theme at drop off, like Griffith Park Observatory. Consider car noise here too.

Other Items (SWA)

Temporary Landscape west of North Mall -- More suggestions for program.

Performing Arts Building Landscape and Trees -- Status?

Before Photo for hand drawn perspective.

Walkways and the need for shade.

Best standards for the placement of shade trees --- where is comfort maximized?

Specify different plant communities.

Running Track: Appropriate radii for track. SA investigating.

Lot A Parking Lot Design: What is the primary strategy? Can we fit more trees into the design?

--------------------------	------	--------	----------	--------

(18) Master Planning

139-006	17Sept09: Once the Master Plan has been approved by the college, the User Groups need to get together to select the design Build Groups and Architects. There will be many tasks for all to be complete once the Master Plan has been approved. Jim has already begun interviewing architect firms for Design Build. Once the interviews are complete, he will compile a list of the qualified firms and present it.	All	New	No
139-007	17Sept09: Dr. Carleo – The Campus should hold a Town Hall meeting so the other groups can see what has progressed with the Master Plan. Concerns/opinions:			

MEETING NOTES

PRIORITIZATION

Don G. concerns – the area and the space of the buildings need to be taken into account, especially those that are not as occupied such as the Cafeteria and the Book Store. One needs to think, is it worth it to spend all this money? The end result could mean less money in the faculties pocket for their classrooms, programs, benefits, etc. And, what is the goal of the Educational Master Plan?

Tom Lopez concerns – the budget needs to be taken into account.

Yasmin D concerns – internet café's, community centers and student gathering places are a good idea.

Larry N concerns – the sizes of the offices for the faculty and counselors in the SSC seem to be a bit larger than the normal standard size office.

Yefrem Kozin concerns – Bungalow 78 is to be demolished in the near future. What are we going to do about the cables? There will be a need for a new data center.

Dr. Carleo – there will be about 12 points that will be address regarding the Master Plan. A Town Hall meeting seems to be appropriate. The prioritization of the Master Plan needs to be determined along with the budgets, Prop J and scheduling.

141-001

15Oct09:

Elena presented Education Master Plan.

- There is a copy on the website where one can print the presentation from there.
- Four goals discussed re: Facility Implications

Facilities Master Plan presented – Topics included:

- Lecture/Lab Utilization and Findings
- ASF
- A/AA Projects – completed and renovated
- Measure J Projects
- Master Planning Process
- Master Plan Goal
- Draft Master Plan in Horizons 1, 2
- Draft Finding
- Landscape

Per Dr. Carleo: there needs to be prioritization of the Master Plan. A presentation will be given to the Board of Trustees when they are on campus on November 18th. On Tuesday, October 20th, the FMP will come together at 1:30 in the CCR to discuss the Master Plan, Measure J and set sequencing for which projects are to begin. This is a one item Agenda. Tom J and Jim will be Co-Chairs. Elena will facilitate the meeting. The meeting will run as long as it needs to.

At the next FMP meeting on October 29th, the recommendations from the FMP will be presented. Elena will email today's presentation to everyone so they will have something to look at on Tuesday.

Elena presented two questions re: the Student Services building:

MEETING NOTES

PRIORITIZATION

- Can we bring back to the building what was Value Engineered out? ie, the canopies and the sun shades. FMP voted Yes. However, the design of the canopy is to be presented to the Design Group.

- Color pallet for the buildings. Accent colors and color schemes are to be determined by the FMP next time.

142-001

20Oct09:

The purpose of the meeting today is to prioritize the Measure J projects.

Dr. Carleo opened meeting with some ground rules. She also indicated there is a sign-in sheet being circulated and asked that people sign it. A copy is attached herewith.

Many students attended. Ian Coyne, VP of ASU, distributed a handout listing various amenities they would like to have at the new Student Union Building/Monarch Center. The students were very vocal about their desire and outlined the needs of having a Student Union on campus.

Elena indicated we are here to review and prioritize the projects. Tom J. indicated that only FMP members have voting rights. Jim read the list of names to the group.

Elena presented the spreadsheet which contains all the projects including cost estimate summary. The Committee then prioritized the projects, via polling, ranking each project as High, Medium, or Low.

After the prioritization exercise, Elena calculated, and then came up with a new list grouping projects in three different categories; high priority, medium priority, and low priority. Copy of the list is attached herewith.

Next step:

The Committee will present its recommendation to Dr. Carleo on 10/29/09.

143-007

29Oct09: Due to time constraint, Project Priority List to be discussed at next FMP (Nov. 12).

144-001

12Nov09: Elena presented the Project Priority List. Goal is to do the projects from the high priority and medium priority list.

Elena discussed the Master Plan.
Alex presented the landscape plan.
Elena presented the exterior color palette.

Elena indicated we do not have enough money to do all projects, but if we remove the Instructional Building, then it would be possible. Larry N. indicated that the group he represents feel that we should not remove or make the Instructional Building be less important than the Student Union. There was discussion between Larry N. and Ian Coyne as to which is more important. Jim asked that FMP make their decision soon so that we can move forward due to escalation.

MEETING NOTES

PRIORITIZATION

Israel asked that the cost of each project be presented on the spreadsheet.

Diedra asked that the list be presented which includes costs and line shown where money runs out.

Tom L. wants central plant upgrade project to be included on the list.

Sheri Berger indicated that the projects from A/AA that did not get done should be on the top of the priority list . Also, the priority list doesn't match the Ed Master Plan. Joanne stated no more ranking is needed. Would like to know what we need to do to get BUG group together to move forward.

Action:
Steinberg will link dollars to projects
Steinberg will then present the sequence
Then FMP will make decision.

144-002 12Nov09: Alex Robinson of SWA presented the landscape. Alex reviewed the site furnishings we have and made recommendations where appropriate. Alex made suggestions about what kinds of plants to plant at various areas of the campus. Tom J. is concern about the weed issue at Monarch Square. Jennifer indicated the lavender plants tend to attract a lot of bees.

Steinberg will work with arborist and landscape architect to put together the "Tree Master Plan."

Diedra wants the plants in the circle in front of campus replaced.

144-003 12Nov09: Color guidelines – Elena presented our current color palette. Goal is to have:
Base color
Primary accent
Secondary accent
Then Elena presented the palette board created by Steinberg with recommended colors for the three paints above. Palette and recommendation was well received. FMP approved the new color palette.
