**Bulletin Title: Bottle Filling Station/Hydration Station****Contact:** Johnson Nee (323) 980-2625      [johnson.nee@build-laccd.org](mailto:johnson.nee@build-laccd.org)

To promote sustainability and reduce plastic bottle waste on each campus, all new building construction projects shall provide a minimum of one (1) bottle filling/hydration station within the project limits.

- Refer to LACCD Facility Design Standards Version 02 Section 22 47 13 for design requirements.

The Design Consultant shall meet with both the College Facility Director and the BuildLACCD Construction Project Team to determine the features, filtration requirement, and location of each filling station on site or within the building.

All designs shall be in full compliance with current CPC and CBC codes and ADA requirements at time of design.
