## Watson Center

The 16,312 square foot Watson Center is the new home for the Film & Television Production Program at West Los Angeles College. The complex is composed of new teaching stations, a sound stage with overhead catwalk, workshop, prop shop, costume lab, faculty offices, and some exterior site work.

Watson Center also incorporates useable outdoor instructional space into the design of the site. The exterior walls and most of the perimeter of the shop building are poured-in-place concrete panels. The new building is designed with sustainable features to meet LEED certification.

The Motion Picture, Television and Stage Production Crafts Program is a multi-tiered motion picture, television and stagecraft production education training program that covers the entire spectrum of the entertainment industry's career pathways. Students learn specialized skills in different crafts from highly experienced industry professionals.

West Los Angeles College is an accredited California Community College offering paths to transfer to universities, career education and courses for personal or professional growth over 12,000 regular or extension students. The campus occupies 70 park-like acres overlooking Culver City, Marina Del Rey and the Greater West Los Angeles area.
